Executive Summary

1st Quarter 2009

This report covers Wurts & Associates' evaluation of the investments within the portfolios relative to the Fresno County Employees' Retirement Association's (Association) Investment Policy and Guidelines (Guidelines). It contains a compliance worksheet summary of the investments evaluated, the private and public managers' representations regarding compliance, and a detailed compliance worksheet specifying the scope of each evaluation.

The Association's portfolio is comprised of both commingled vehicles and separate accounts. All of the separate account managers employed by the Association have specific language within the Guidelines for Wurts & Associates to evaluate. Please refer to Exhibit A which is a table summarizing the managers employed by the Association, the type of investment vehicle used by each, the general asset class of the investment, and whether or not the Guidelines contain specific language.

Investments made by managers using a commingled vehicle are typically governed by a partnership agreement or prospectus. The reason for this is that since commingled investment vehicles are designed to accommodate many different investors, only one common document may govern the investment strategy.

Public Market Managers

All managers employed by the Association that manage publicly traded securities have specific language in the Guidelines. Wurts & Associates has evaluated each manager's compliance relative to these guidelines and they are contained in this report. Grantham, Mayo, Van Otterloo & Company (GMO), Mondrian Investment Partners Limited, and State Street Global Advisors are employed through the usage of a commingled fund. The investment policies of these managers shall be governed by their prospectuses.

Private Market Managers

Private Market Investment Managers are given full discretion within the scope of their assigned segment, governed by their Limited Partnership Agreements. All private equity managers employed by the Association are made through commingled vehicles and none of them has specific language in the Guidelines to evaluate. All have warranted that they have complied with the appropriate governing authority over their investment strategy. Wurts & Associates is unable to verify this compliance.

Real Estate Managers

The Real Estate Investment Managers employed are given full discretion within the scope of the relevant language that governs the investment strategy. None of them has specific language in the Guidelines to evaluate. All have warranted that they have complied with the appropriate governing authority over their investment strategy. Wurts & Associates is unable to verify this compliance.

Summary of Findings

Of the managers employed by the Association that have specific guidelines, Wurts & Associates has determined the following:

Manager	In Compliance	Out of Compliance
Aronson + Johnson + Ortiz	✓	
Brandywine Asset Management	✓	
Kalmar Investments Inc.	✓	
Wellington Capital Management	✓	
Enhanced Investment Technologies (INTECH)	✓	
State Street Global Advisors	✓	
Mondrian Investment Partners Limited	✓	
Oechsle International	✓	
Franklin Templeton (International)	✓	
BlackRock, Inc.	✓	
Western Asset Management Company	✓	
Bradford & Marzec	✓	
Loomis Sayles	✓	
Grantham, Mayo & van Otterloo	✓	

We are pleased to report this quarter that there were no material breaches of any consequence by any of the managers we audit.

Jeffrey MacLean
President & Chief Operating Officer

Mondrian Emerging Markets Equity Fund, L.P. (the "Fund")

Certification of Compliance with Investment Strategy

for the period from January 1, 2009 to March 31, 2009

The Fund has been in compliance with its Investment Strategy, as fully set forth in the Confidential Information Memorandum of the Fund, during the period described above. Each item of the Investment Strategy is described in the Appendix and initialed as being in compliance.

Mondrian Investment Partners Limited
(as Investment Manager to the Fund)

By: R. Akester
Name: R. AKESTER
Title: SENIOR PORTFOLIO MANAGER
Date: 2 APRIL 2009

Mondrian Emerging Markets Equity Fund, L.P.

Investment Strategy Detail	Initial
<p><u>Securities, Approach and Markets</u></p> <p>The Fund pursues its investment objective primarily by investing in equity securities of emerging market companies, as described below, that, in the Investment Manager's opinion, are undervalued at the time of purchase based on fundamental value analysis employed by the Investment Manager. Equity securities in which the Fund may invest include, but are not limited to, common stocks, preferred stocks, convertible securities, index related securities, certain non-traditional equity securities and warrants. The Fund may purchase securities of non-U.S. issuers directly or indirectly in the form of American, European or Global depository receipts or other securities representing underlying shares of non-U.S. issuers. The Fund may also purchase other investment funds, including, but not limited to registered funds, unregistered funds and REIT's. Under normal circumstances, the Fund invests at least 80% of its assets in investments of emerging market issuers.</p> <p>The Investment Manager's approach in selecting investments for the Fund is primarily oriented to individual stock selection and is value driven. In selecting stocks for the Fund, the Investment Manager identifies those stocks that it believes will provide capital appreciation over a market cycle, taking into consideration movements in the price of the individual security and the impact of currency fluctuation on a United States domiciled, dollar-based investor. The Investment Manager conducts fundamental research on a global basis in order to identify securities that, in the Investment Manager's opinion, have the potential for long-term capital appreciation. This research effort generally centers on a value-oriented dividend discount methodology with respect to individual securities and market analysis that isolates value across country boundaries. The approach focuses on future anticipated dividends and discounts the value of those dividends back to what they would be worth if they were being received today. In addition, the analysis typically includes a comparison of the values and current market prices of different possible investments. The Investment Manager's general management strategy emphasizes long-term holding of securities, although securities may be sold in the Investment Manager's discretion without regard to the length of time they have been held.</p>	<p>R/E</p>
<p><u>Emerging Markets Company</u></p> <p>The Fund considers an emerging country to be any country that is included in the International Finance Corporation Free Index or the Morgan Stanley Capital International Emerging Markets Index. In addition, any country which is generally recognized to be an emerging or developing country by the international financial community, including the World Bank and the International Finance Corporation, as well as any country that is classified by the United Nations or otherwise regarded by its authorities as developing will be considered an emerging country.</p> <p>There are more than 130 countries that are generally considered to be emerging or developing countries by the international financial community, approximately 40 of which currently have stock markets. Almost every nation in the world is included within this group of developing or emerging countries except the United States, Canada, and those in the Morgan Stanley Capital International EAFE Index.</p>	

In considering possible emerging countries in which the Fund may invest, the Investment Manager places particular emphasis on certain factors, such as economic conditions (including growth trends, inflation rates and trade balances), regulatory and currency controls, accounting standards and political and social conditions. Although this is not an exclusive list, the Investment Manager considers an emerging country equity security to be one that is issued by a company that exhibits one or more of the following characteristics: (1) its principal securities trading market is in an emerging country, as defined above; (2) while traded in any market, alone or on a consolidated basis, the company derives 50% or more of its annual revenues or annual profits from either goods produced, sales made or services performed in emerging countries; (3) the company has 50% or more of its assets located in an emerging country; or (4) it is organized under the laws of, and has a principal office in, an emerging country. The Investment Manager determines eligibility based on publicly available information and inquiries made of the companies.

Currently, investing in many emerging countries is not feasible, or may, in the Investment Manager's opinion, involve unacceptable political or governance risks. The Fund focuses its investments in those emerging countries where the Investment Manager considers the economies to be developing and where the markets are becoming more sophisticated.

PC

Currency, Debt Securities and Cash

Currency considerations carry a special risk for a portfolio of international securities. The Fund may invest in securities issued in any currency and may hold foreign currency. Securities of issuers within a given country may be denominated in the currency of another country or in multinational currency units, including the euro. The Investment Manager primarily uses a purchasing power parity approach to evaluate currency risk. In this regard, the Fund may carry out hedging activities, and may invest in forward foreign currency contracts to hedge currency risks associated with the purchase of individual securities denominated in a particular currency. Under normal circumstances, hedging is undertaken defensively back into the base currency of the Fund.

Under normal circumstances, no more than 10% of the Fund's assets will be invested in debt securities issued by governments or by their agencies, instrumentalities or political subdivisions, or by corporate entities, all of which may be high-yield, high-risk fixed income securities rated lower than BBB by S&P and Baa by Moody's or, if unrated, considered to be of equivalent quality. In addition, for temporary defensive purposes, the Fund may invest in high-quality debt instruments.

To facilitate investment activities, the Fund will generally hold a small portion of its assets in cash or cash equivalent instruments.

PC

The Investment Manager manages the Fund's assets in accordance with the investment objective and guidelines described in the Confidential Information Memorandum and not in accordance with the individual guidelines of any one investor.
