SCOPE OF WORK

The County of Fresno on behalf of Internal Services Department's Information Technology Services Division (ITSD) is requesting proposals from qualified firms to perform an external audit of their information technology environment. The Board of Supervisors have authorized and budgeted for this audit in order to comply with Health Insurance Portability and Accountability Act (HIPAA) and security rules. The purpose of this external penetration test of the County's network is to identify any unauthorized accessibilities and /or vulnerabilities to the confidentiality, integrity, and availability of electronic protected health information (ePHI).

This audit is to be performed in accordance with generally accepted security best practices, the security auditing standards set forth by the HIPAA Security Rule, and other professional standards as necessary. The vendor shall use the standard "white hat" methodology.

The vendor that was awarded the last audit in 2012 was Moss-Adams LLP, and is not eligible to be awarded this audit.

NATURE OF SERVICES REQUIRED

A. Background

The County budgeted for the external penetration tests to identify any unauthorized accessibilities and/or vulnerabilities. The County's HIPAA Risk Assessment and Risk Management of electronic protected health information required an external audit to ensure that this data can only be accessed by authorized users and that appropriate safeguards are in place. The time covered by these tests will be one month including the report-writing phase or other meetings. Additional information regarding the number of meetings, the locations of the meetings, and the attendees will be provided at the vendor's conference.

B. General

The County of Fresno is looking for an external information technology auditor to perform a penetration test of the County's network infrastructure. The company selected for the audit should have experience doing an external penetration test for a public agency of similar size and complexity of the County. Areas to be considered are corporate maturity, quality of references, quality control, financial stability, organizational capacity and staff experience, integrity and qualifications. County will not do a background check. The audit is to be performed in accordance with the provisions contained in this request for proposal. The Security and Data Administration Division Manager of the Internal Services Department's Information Technology Services Division (ITSD) will be the coordinator of the project. The audit will produce a report outlining procedures performed, findings and recommendations within the time defined within the Background.

C. External Penetration Scope of Work to be performed

The County of Fresno desires the auditor to audit and prepare a report on the County's network infrastructure vulnerability to exploitation via remote, man-made, and/or electronic attacks, re-testing is not required. The penetration test will be limited to those County networks and systems within the assigned responsibility of the Information Technology Services Department and will not extend to specialized networks or systems with the assigned responsibility of other County or state departments. The auditor should take the view of a malicious attacker, simulating any number of tactics a hacker might take to get access to critical County information. This audit will be done as a "white hat" audit. The

coordination and oversight of this audit will be provided by the Security and Data Administration Division Manager.

D. Penetration Testing:

Execute a real-world attack on critical infrastructure and understanding level of risk that exists at a single moment in time. Also, validate from the perspective of an Internet-based attacker, a rogue employee, a compromised business partner, malicious customers, or any combination of these. The assessment should consist of the primary devices and services below and have the ability to adapt or add if auditor deems necessary to accomplish an accurate and thorough testing of the network, infrastructure, and possible risks and vulnerabilities to electronic protected health information (ePHI). Identified below are various examples of where the auditor should validate the County's protective safeguards. The auditor is encouraged to append to the following list.
