If it is later determined that the Bidder failed to disclose required information, any contract awarded to such Bidder may be immediately voided and terminated for material failure to comply with the terms and conditions of the award.

However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

1. Provide a user-friendly, functionally rich, and technologically current integrated system which must have been successfully and fully operational in an organization of similar size and complexity as the County of Fresno for at least six months at the time of proposal evaluation.
2. Be an operationally proven package that can be implemented quickly so that its benefits can begin to accrue within a reasonable period of time.
3. Provide strong end-user, ad hoc data access and reporting capabilities.
4. Remain current with general information technology industry standards.
5. Provide an application programming interface (API) to interface with other systems.
6. Provide a software asset management tool that is capable of recording various types of licenses organized by department within the County.
7. Provide discovery software installed across the computer network, and collect software file information such as title, product ID, size, date, path, and version. This discovery software should not severely impact the performance of the workstation or network. Identify the expected performance impacts.
8. Provide a software license auditing tool that will run over the network and identify deployed licenses across all systems of the network. This tool should provide reporting of installed licenses to a centralized database.
9. Track software license keys along with key information such as software product, owner, and installed location.
10. Provide an inventory of the assets for all systems.
11. Differentiate between named user license, volume licenses, enterprise agreement licenses, concurrent licenses, Original Equipment Manufacturer (OEM) licenses, evaluation license, and free licenses.
12. Compare licenses purchased to consumed and identify under/overages.
13. Provide the ability to uninstall invalid or non-compliant licenses.
14. Monitor software utilization.

15. Describe any related modules that might include order tracking, hardware tracking, or any supplemental products that might benefit the County of Fresno and include separate pricing for these models.

SYSTEM ARCHITECTURE

Describe how the SAM may provide the specific functionality required to support the architecture components requirements

1. Describe how your proposed system is consistent or compatible with the following desired architecture components:
 - A. Browser-based architecture which maintains a centralized data repository and processes that data on a central application server.
 - B. Operate on a data network developed and maintained by ISD, which will include Local and Wide Area Networks (LAN/WAN).
 - C. Hardware, operating system, database management system, and programming languages which are currently supported and commonly used in the IT industry.
 - D. An API
 - E. A software development kit(SDK)
2. Provide high level diagram(s) of the overall proposed/recommended system including inbound and outbound information flows through the different components of the system.
3. Provide a description of who/where the various components fit in the overall system. Indicate where each component resides, i.e., server, desktop PC, etc.
4. Describe what is shipped to your customers, i.e., source code, object code, manuals, documentation, sample reports, etc.

TECHNOLOGY REQUIREMENTS

The SAM must be capable of operating within the existing Fresno County IT environment including its Local and Wide Area data network and hardware and software infrastructure. It must comply with internal County IT standards so the application does not require its own separate technical environment, and have the capability of inter-operating, integrating, and/or interfacing with County systems as well as with standard office automation products.

1. The application must run on a client operating system that is consistently and currently supported by the operating system vendor. Applications under maintenance are expected to always be current in regard to the required client O/S. No outdated or unsupported client O/S will be implemented on the County network.
2. In order to support a secure environment, the application must run on the latest supported release of any required third-party software, such as JAVA, Flash, etc. within 30 days of release.
3. Should the SAM require installation of software on the client PC, the SAM will not be installed under a specific User Profile. It must install and be available to all users on the all users' desktop.
4. Administrative rights will not be granted to either the client or the server in order for a user to perform day to day operations of the SAM. An account may be granted elevated privileges in order to do data collection.
5. The SAM must use generally accepted IT industry methodologies for software design, especially for external data exchange interfaces, Application Programming Interfaces (APIs), and interfaces to common infrastructure support services
6. Respondents must describe the technology underlying your proposed solution and the extent of its compatibility with the Fresno County IT standards described above.
7. Respondents must fully describe the hardware, software, and network capability required to implement and operate the proposed system for current user and client volumes, as well as to accommodate a potential 15% annual increase over a five year period.

8. Respondents must identify the specifications and quantity of each hardware, software, network or telecommunications component required to operate the proposed system at the performance levels specified above.

COMPANY STRUCTURE

The vendor must have organization and management structure adequate and appropriate for overseeing and supporting the proposed services, and must provide sufficient management, customer service, and technical support staffing levels to sustain the SAM for ISD.

1. Describe, in detail, your organization's company structure.
2. How many project managers, customer service, and/or technical support staff would be assigned and available to assist and support ISD and the SAM project, initially through implementation, and ongoing for maintenance?
3. How many clients are using the proposed solution? How long has the solution been in a production mode for these clients?

IMPLEMENTATION REQUIREMENTS

Implementation is defined as all tasks performed by the vendor and ISD staff related to configuring, developing interfaces, installing the system, functionally and operationally testing the system, documentation, training, and implementation.

The vendor will be responsible for tracking, resolving, or coordinating the resolution of all reported problems, and ensure that they are corrected within a reasonable period, so that the implementation date can be met. The vendor must have staff members who will be accessible by e-mail and/or telephone to diagnose and resolve problems.

Although ISD desires an expeditious implementation, it recognizes that the implementation schedule should be realistic and consistent with the estimates of the vendor. The vendor should prepare a realistic yet aggressive implementation plan, which it believes can be achieved.

The following describes each of the implementation tasks:

Task 1 – Project Management

Planning and conducting initial meetings between the vendor and ISD to formalize project management organization, protocols, lines of communication, and expectations. Followed by ongoing liaison and status reporting to ISD during the entire implementation period.

The vendor and ISD shall be responsible for establishing an organization to manage and deliver the goods and services defined in the Scope of Work. The vendor shall provide a project organization chart describing the project organization, which will be in place during the duration of the contract with ISD. The vendor shall designate a Project Manager for the project who will have the authority to commit the resources necessary to satisfy all contractual requirements.

A proactive approach to risk assessment and management is essential to maximize the probability of success. The vendor should utilize a comprehensive methodology for ongoing project risk management, which addresses such issues as technical risk, resource issues, scheduling problems, readiness, etc.

The vendor shall define escalation procedures to address extended and unresolved problems to the vendor Project Manager and ISD Project Manager. Notification and emergency procedures shall be established in the event of system failure. The escalation procedures shall require approval of the vendor Project Manager and ISD Project Manager. The escalation procedures shall include, but not be limited to the following:

- Conditions warranting additional help in resolving a problem
- Time duration between escalating to the next level of support
- A diagram depicting the various levels of response

- The names or titles, telephone numbers, and e-mail addresses of the vendor personnel responsible for response at the various levels of support

Task 2 – Develop Vendor/ISD Design & Implementation Work Plan

The vendor and ISD shall develop a consolidated project plan, which identifies all vendor and ISD tasks and responsibilities. The approved project plan will be the basis for all project activities. It can be amended with ISD and vendor approval as needs may dictate.

The vendor shall develop a Project Work Plan and Implementation Schedule for the project that shall include an agreed upon format and content items determined by the vendor and ISD. The vendor shall provide, for ISD approval, the project plan prior to initiating any tasks. The vendor shall maintain an up-to-date version of the work plan using Microsoft Project or other software as approved by ISD. The ISD Project Manager must approve all changes to deliverable time frames that will impact major milestones in writing at least two weeks prior to the milestone. All approved changes shall be reflected in the work plan and the vendor shall highlight and explain any major changes to an earlier approved version.

The vendor should identify all relevant assumptions that were made in the development of the project plan. All assumptions upon which the estimates have been calculated must be clearly documented; including assumptions made for development software tools, use of any third party software, County of Fresno resources providing assistance, etc.

Task 3 – User Acceptance Testing

The vendor must conduct a User Acceptance Test to ensure that ISD users are able to successfully use the SAM. The vendor must develop test scripts for this test, review the results and recommend initial system acceptance. ISD users will assist in the actual test and will be responsible for final approval of user acceptance test recommendations.

Task 4 – User Acceptance Test Corrections

The vendor will make any corrections based on the results of the User Acceptance Test.

Task 5 – User Documentation

The vendor must develop and/or have available user documentation in electronic form, which details how users perform SAM functions. Hardcopy documentation will not be accepted. The manuals shall present the system functionality to new users in a clear, concise, non-technical manner. The manuals shall reflect the version of the system as delivered to ISD. ISD shall be granted permission by the vendor to make unlimited additional hard and soft copies of all the vendor-developed training materials for its exclusive use in training personnel, at no additional charge. Additionally, a corresponding on-line tutorial and/or instruction on system use for new staff is desired.

Task 6 – Train Users

The vendor shall provide ISD staff with the training necessary to operate the SAM. The vendor shall provide initial training for identified users. At a minimum, approximately ten (10) users must be trained.

Training must be conducted at facilities in the Fresno area or remotely using web conferencing. ISD will be responsible for ongoing training after full implementation. ISD will be responsible for securing an appropriate location for training per the specifications of the vendor.

Task 7 – Post Implementation Review

The vendor will conduct a post-implementation review three months after the SAM rollout to confirm that the system is working as expected. This review must confirm that functionality has been obtained, response times have been achieved, appropriate vendor support has been provided, and ISD users have been successfully trained.

MAINTENANCE AND SUPPORT

The vendor shall be responsible for maintaining and supporting all installed application software, initially under a one year warranty, beginning after full acceptance of the system upon implementation. Further support will be provided under ongoing software maintenance renewals.

Upon payment of annual maintenance, the cost of support will be borne by the vendor unless issues can be shown to be directly attributable to malfunctioning hardware, network, operating system or other system components whose operation and maintenance is the responsibility of ISD.

The vendor shall be responsible for establishing the operations and maintenance procedures for the system. The vendor shall provide the necessary documentation and procedures in electronic form to support ISD operation of the system.

Under these tasks, the vendor will perform the following:

1. Distribute any software upgrades or version replacements to which ISD is entitled under the software maintenance agreement, along with updated user and operational documentation in electronic form, and assist in its installation in the test environment and migration to production.
2. Maintain compatibility and integration with any third party reporting tools that have been implemented as part of the contract. Should any of these packages be upgraded, ISD will notify the vendor in advance, so that analysis and code changes can be implemented as quickly as possible.
3. Develop procedures and establish notification for software distribution to ISD and its business partners who may be users of the system including any application server software and any client software (if needed).
4. Correct any errors in functionality which are reported by ISD within a reasonable period, depending upon the severity of the error.
5. Utilize a Severity Index for categorizing and prioritizing application code errors.
6. Provide a means for ISD staff to report system problems via e-mail and telephone to vendor staff who are dedicated to supporting clients and are accessible as required.
7. Ensure that responses are made to ISD staff, within specified time periods, acknowledging receipt of the problem report and identifying when direct contact can be made with the vendor-assigned support staff person.
8. Establish policies and procedures for prioritizing and responding to ISD requests for support including:
 - Criteria for diagnosing reported problems and determining probable cause(s) of the problem
 - Use of Severity Index criteria for assessing the impact of reported problems
 - Procedures determining responsibility for problem resolution
 - Defining response time for various categories of problems
 - Documenting the response and subsequent actions
 - Procedures for escalating disagreements with ISD regarding cause of the problem and responsible party
 - Procedures for working cooperatively with ISD staff to promptly resolve problems
 - Tracking all problem reports
9. Correct any application software errors through remote or on-site service by vendor personnel or otherwise qualified subcontractors according to the response times.
10. Update and distribute user and operational documentation in electronic form to reflect any software corrections.
11. Provide a means for ISD to submit requests or proposals for new or enhanced functionality, outside of the core software components.
