Revised Exhibit 2

1. Please quote the cost of initial gopher and squirrel removal and **annual** maintenance of gopher and squirrel control inside the black line. This is **not** to include flower bed areas behind the residential pods.
2. Please include with your quote:
 - The initial method of control you would employ and any restrictions on access to treated areas,
 - Maintenance method, schedule, and restrictions on access, and
 - MSDS sheets
3. Establishing a line of defense for on-going gopher and squirrel control is challenging. We have included the front lawn area to reduce the possibility of gophers re-entering by tunneling under the walls. Buildings and paving should reduce access from outside the facility in most areas. If you have suggestions of more defensible boundaries, please call Janet Stutzman at 559 600-1245.

Remember: All personnel working within the institution must pass background checks prior to beginning work.
