

Attachment C
**Fresno County EMS Request/
Transport Volume Data**

The EMS Agency is providing Fresno County Response Data to RFP participants who have submitted a letter of intent. The data is provided on a CD, which is included in the RFP Binder.

The Fresno County Dispatch data includes all responses by ambulances from the Exclusive Operating Area. These responses include response within the EOA and outside of the EOA. Since the Exclusive provider is occasionally requested to respond into adjacent zones, the data contains all responses that involve an ambulance from the Exclusive Operating Area.

The data is provided in Microsoft Access© database. This will allow the user to manipulate the data in Microsoft Access© or the ability to extract the data to a different format.

Any questions regarding data elements or contents of the tape can be directed to the Procurement Coordinator.
