P. 17

The electronic measuring equipment at the Granite Ridge Site is linked to the website <http://www.wunderground.com/weatherstation/WXDailyHistory.asp?ID=KCASHAVE11>.

This electronic measuring equipment has a battery backup in the event of power failure, however, if this equipment is damaged or fails to function correctly, measurement data taken manually on a daily basis at the same location will be substituted during the period of equipment failure. If the electronic measuring equipment fails, and manual measurements are not obtainable, then measurements from measuring equipment located at the Shaver Lake Regional Facility will be substituted during that period.

P. 19

If measuring equipment at Granite Ridge Pump Station is damaged or unable to produce reliable data, precipitation amounts gathered at the Shaver Lake Regional Facility will be used to calculate reimbursement amounts.
