10-Year Treasury Yield	4.12%	3.81%	3.15%

Second Quarter (Complete Quarterly Investment Report for both the 457(b) and 401(a) plans are provided as **Exhibit A and B**)

Following a period of aggressive rate hikes, which led to the Fed funds rate surpassing the CPI inflation rate, we may be nearing the end of the tightening cycle. Inflation continues to play a pivotal role in this outlook, with lower energy, food, and vehicle prices contributing to falling inflation. Despite positive economic indicators, uncertainty persists, with 12 out of the 18 Fed officials projecting the potential for additional rate increases by year-end. The headwinds caused by the rapid rate hikes have begun to wane and the economy continues to normalize, resulting in a reduced risk of recession. The stock market has shown signs of improvement due to the expectation of lower inflation. The economy's strength has been underscored by notable job creation, low unemployment rates, and a robust employment-population ratio. Despite concerns about rising credit card debt, balances have remained relatively stable and disposable income has shown healthy growth. While consumer sentiment remains below average, it's the consumer who has driven the recovery and carried the economy through last year. In 2022, the primary recession risk stemmed from the Fed's rapid rate hikes, which negatively affected housing, financial markets, and

business activity. However, these sectors are recovering, and consumer strength continues to be a driver of the economy. Overall, the strain from financial conditions appears to be easing as we approach the conclusion of the Fed rate hike cycle.

- **U.S. Equities:** The S&P 500 rose by 8.7% in the last quarter and 19.6% over the past year, as of the most recent quarter-end. Large cap growth outperformed value stocks in the recent quarter but lagged behind over the year. Among S&P 500 sectors, eight of eleven saw gains, led by a 15.4% increase in Technology. Small caps gained 3.4% in the last three months and 9.8% in the past year.
- **International Equities:** The MSCI EAFE benchmark returned 3.0% in the last quarter and 18.8% over the past year, as of the most recent quarter-end. The MSCI Emerging Index returned 0.9% in the last quarter and 1.8% over the last year. Emerging Markets faced challenges due to US-China tensions and concerns about China's economic recovery.
- **Fixed Income:** The Bloomberg US Aggregate Bond Index returned -0.8% in the first quarter and -0.9% over the past year, as of the most recent quarter-end. The yield on the 10-year treasury bond increased to 3.81% this quarter, up from 3.48% at the beginning of the quarter and significantly higher than the 3.0% from a year ago. The ICE BofA High Yield Index returned 1.6% in the last quarter and 8.9% over the past year.

Economic Factors

- Headline CPI increased 0.4% in April, 0.1% in May, and 0.2% in June, marking a seven-month deceleration trend. From a peak of 8.9% in June 2022, CPI dropped to 3% in June 2023. Core CPI, excluding food and energy, also decreased from 5.9% (June 2022) to 4.8% (June 2023), but remains above the 2% target. Notably, Core CPI stayed higher than headline inflation due to rising housing prices. Sectors with the largest price hikes year-over-year as of quarter-end were automotive and insurance, recreation, and household furnishings.
- Since March 2022, the unemployment rate has stayed within the mid 3% range, reaching 3.6% in June 2023. In the first half of 2023, 1.7 million jobs were created. The jobs-to-unemployed ratio remained stable at 1.7, showing improvement from the peak of 5.9% in March 2022. This data indicates a healthy labor market and successful efforts by the Fed to manage wage-related inflation.
- The U.S. registered 2.0% annual GDP growth in Q1 2023, following 2.6% and 3.2% growth in the preceding quarters. Despite a slowdown and temporary contraction in 2022, the U.S. economy has shown resilience in the first half of 2023, and much of the data suggests continued improvement.

Investments

- Alger Small Cap Focus Y (AOFYX) scored 10 out of 100 this quarter due to recent underperformance. The Council voted unanimously at the June 15, 2023 meeting to remove Alger Small Cap Focus Y (AOFYX) as an Investment Alternative and map all assets to American Century Small Cap Growth (ANODX). The fund mapping occurred on September 8, 2023.
- Alger Spectra Y scored 8 out of 100 this quarter due to recent underperformance. The Council voted unanimously at the June 15, 2023 meeting to remove Alger Spectra Y (ASPYX) as an Investment Alternative and map all assets to JP Morgan Large Cap Growth R6 (JLGMX). The fund mapping occurred on September 8, 2023.
- The Great-West Target Date Series was removed and mapped to the T. Rowe Price Retirement Blend Trust Series on September 8, 2023.
- Invesco Developing Markets R6 (ODVIX) scored 33 out of 100 this quarter, it is recommended to remain on the watch list due to recent underperformance.
- Metropolitan West Total Return Bd Plan (MWTSX) scored 23 out of 100 this quarter, it is recommended that the fund be added to the watch list due to recent underperformance.
- The remaining investment options are compliant with the County's investment policy performance criteria.

Recommended Actions

- 1. Receive and File the 457(b) Deferred Compensation Plan and 401(a) Defined Contribution Plan Investment Reviews as of June 30, 2023.**
- 2. Approve keeping Invesco Developing Markets R6 (ODVIX) on the watch list.**
- 3. Approve adding Metropolitan West Total Return Bd Plan (MWTSX) to the watch list.**

A Hawkish Pause?

Inflation pulls back on lower energy, food, and used car prices

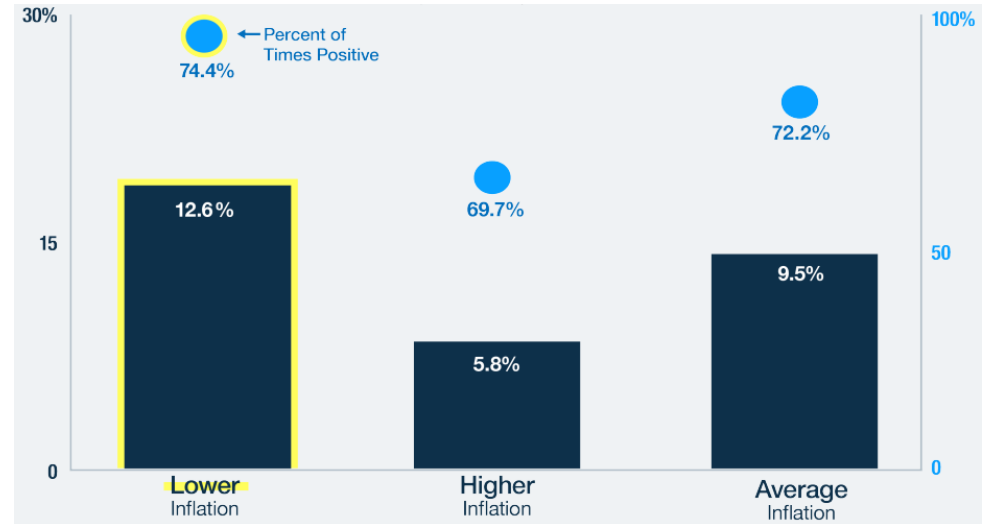

Contributions to CPI Inflation (YOY)

After an aggressive hiking schedule, the Federal Reserve ('the Fed') hinted at a potential end to its tightening cycle. With the Fed funds rate reaching an upper bound of 5.25%—finally surpassing CPI inflation—indications pointed towards a possible conclusion to the rate hikes. Historical patterns suggest that the Fed tends to continue hiking until the Fed funds rate surpasses the CPI inflation, supporting this perspective. However, to the surprise of investors, 12 of the 18 Fed officials projected rates rising at least another half point by the end of the year, pointing to uncertainty on the direction of rates.

Inflation dynamics played a crucial role, with lower energy prices being a significant driver of falling inflation. Recent data also indicated a deceleration in food price inflation. Used car prices declined for several months, and further reductions were anticipated. New vehicle prices also showed signs of decline as improvements were made in the production supply chain. These shifts in inflation, combined with positive economic indicators, raised questions about the duration of high-interest rates set by the Federal Reserve.

S&P 500 Annual Performance Based on How Inflation Does From the Prior Year (1950-2021)

Stock market performance, which suffered due to higher inflation in the previous year, showed signs of improvement. Expectations of lower inflation in 2023 generated an optimistic outlook for investors. Historical data suggested that stocks tend to perform better when inflation is lower than the previous year. The US Leading Economic Index highlighted the pivotal role of the consumer in driving the recovery, while sectors such as housing and manufacturing also demonstrated signs of improvement.

As the economy moves toward normalization, the risks of a recession, which were prevalent in the previous year, have begun to diminish. Headwinds caused by rapid rate hikes gradually dissipated, allowing housing, businesses, and markets to regain stability.

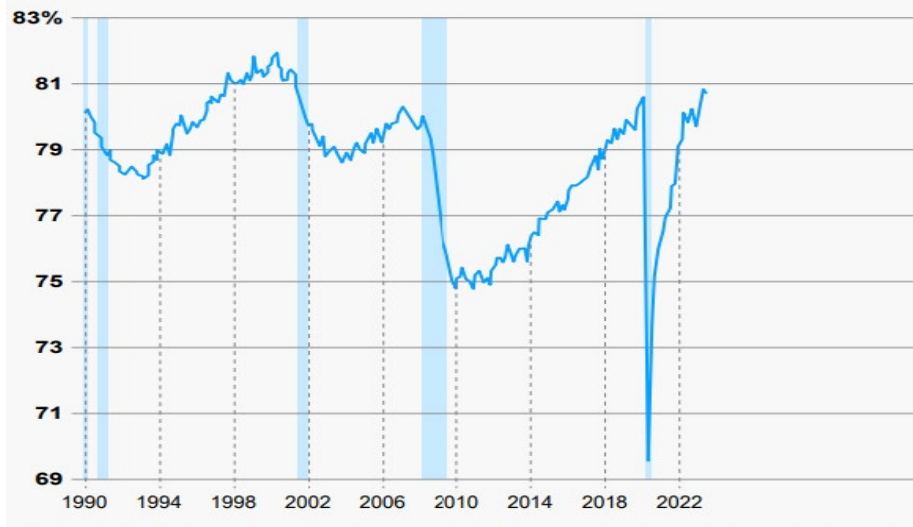

While challenges remained, such as core PCE inflation and progress stagnation in the first half of the year, there was optimism that inflation would decrease in the latter half. This belief was bolstered by the deceleration of shelter inflation, contributing to an overall moderation in inflation levels.

A Hawkish Pause?

The best labor market since the late 1990's

Employment – Population Ratio (25-54 years)

Source: Carson Investment Research, FRED, 05/30/2023
Shaded areas indicate U.S. recessions

Job creation was a notable achievement, with 1.7 million jobs added in the first six months of the year. Surpassing expectations consistently, the economy demonstrated strength and provided a positive surprise to economists and analysts. Unemployment rates stood at a commendable 3.7%, while the prime-age employment-population ratio reached its highest level in over two decades, reaching 80.7%.

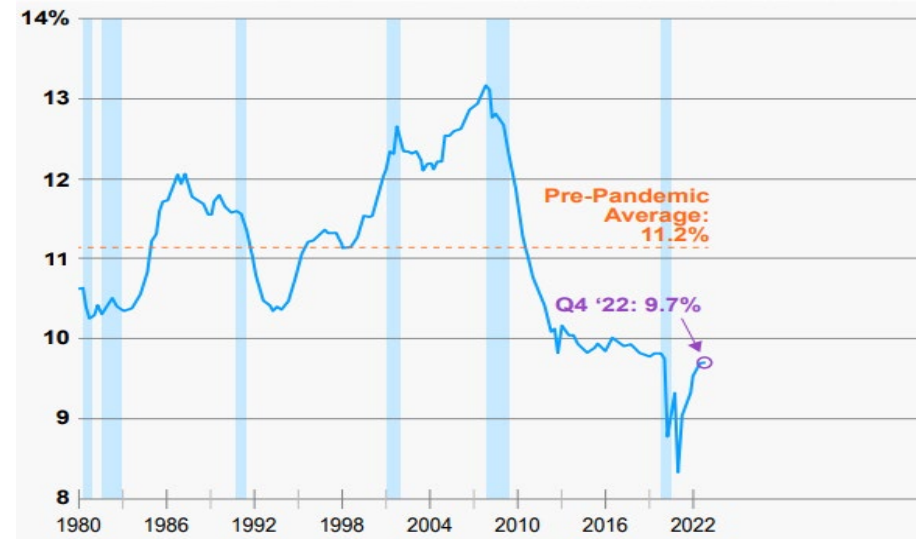

While concerns emerged regarding rising credit card debt, closer examination revealed a nuanced situation. Card balances remained relatively stable in the first quarter, alleviating some worries. Disposable income also exhibited healthy growth, increasing at an annualized rate of 10% through May. Debt service costs as a percentage of disposable income remained relatively low at 9.6% in the first quarter of 2023.

Even with this recent data coming through, consumers and manufacturers remain anxious. Consumer sentiment as measured by the University of Michigan Consumer Sentiment Index ended the quarter at 64.4, which is an improvement from a year ago but remains well below the 20-year average of

Shaded areas indicate U.S. recessions

81.8, indicating consumers remain concerned with persistent high prices. Similarly, only 67% of manufacturers are positive about their own company's outlook, which is the lowest since Q3 2020 as companies are finding it difficult to attract and retain talent and struggling to keep up with inflation.

Looking ahead, the headwinds from last year are fading as the economy normalizes. In a nutshell, the consumer has driven the recovery and carried the economy through last year. Even better, as we discussed earlier, consumer indicators have improved over the first half of 2023.

The main risk of a recession last year was due to the Fed raising rates as fast as it did, which adversely impacted housing, financial markets, and business activity. The good news is that these sectors are improving even as consumer strength continues. Additionally, the drag from financial conditions is beginning to ease as the Federal Reserve gets closer to the end of rate hikes and markets rally.

Markets at a Glance

U.S. Equity & Fixed Income Quarterly Performance

% Total Return USD

Trailing Returns

% Total Return USD

U.S. Equities: The S&P 500, representing large cap equities, returned 8.7% in the trailing quarter and returned 19.6% in the past 12 months. Large cap growth outperformed value for the trailing quarter but underperformed for the year, returning 10.6% versus 6.6%, and 18.3% versus 20.0%. Eight of the eleven S&P 500 sectors increased in the trailing quarter. Technology was the best performing sector with a 15.4% gain while Utilities was the worst with a -2.5% return. Small caps returned 3.4% in the last three months and 9.8% in the past year.

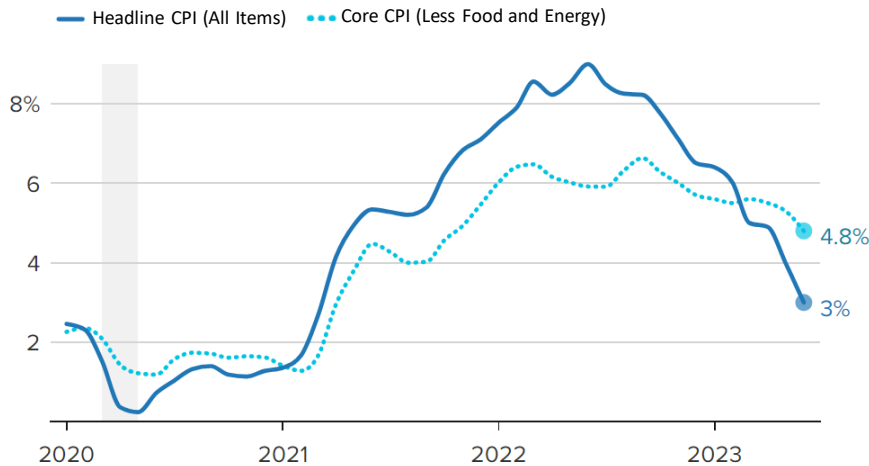

Fixed Income: The Bloomberg US Aggregate Bond Index returned -0.8% in the first quarter and -0.9% for the past 12 months. The yield on the 10-year treasury bond rose to 3.81% by quarter end versus 3.48% at the end of the first quarter and up substantially from the 3.0% a year ago. The ICE BofA High Yield Index returned 1.6% in the trailing quarter and 8.9% for the past year.

International Equities: The MSCI EAFE benchmark returned 3.0% in the trailing quarter and 18.8% for the past twelve months. The MSCI Emerging Index market equities returned 0.9% in the last three months and 1.8% for the trailing year. Emerging Markets were hindered by tensions between US and China and worries about the Chinese economic recovery.

Decelerating Inflation and a Stabilizing Job Market

U.S. Consumer Price Index (CPI)

Year-over-year percent change through June 2023

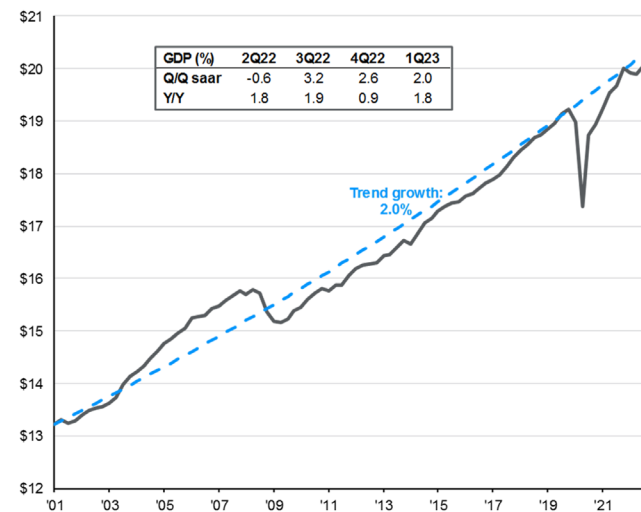

Inflation: Headline CPI increased 0.4% in April, 0.1% in May and 0.2% in June, which is significantly slower than a year ago and continues the decelerating trend over the past seven months. Headline CPI inflation has come down from a peak of 8.9% y/y (year-over-year) in June 2022 to 3% y/y in June 2023. The Core CPI rate, which excludes food and energy, has also come down from 5.9% y/y in June 2022 to 4.8% y/y in June 2023 but was still well over the long term 2% target. Interestingly, the Core CPI rate remained higher than the annual level for headline inflation due to elevated housing prices. As of quarter-end, the largest price increases y/y occurred in automotive and insurance, recreation, and household furnishings sectors.

Labor: Since March of 2022, the unemployment rate has hovered in the mid three percent range, landing on 3.6% for June 2023. This equates to approximately six million unemployed individuals available for work. For the first six months of 2023, the economy has created 1.7 million jobs with 209,000 jobs created in June alone.

Real Gross Domestic Product (GDP)

Trillions of chained (2012) dollars, seasonally adjusted at annual rates

Wages rose by 0.4% in June to approximately 4.4% annually. The ratio of jobs per unemployed person stayed stagnant at 1.7 with little change to the previous quarter and significantly lower than the March 2022 peak of 5.9%. The data suggests that the labor market is healthy and that the Fed policymakers' efforts to combat the wage component of inflation have been successful.

GDP: The first quarter of 2023 registered another quarter of positive GDP growth at 2.0% annually. This followed the 2.6% and 3.2% in the prior two quarters. After the U.S. economy recovered in 2021, growth moderated and even turned negative for part of 2022. During the first half of 2023 the U.S. economy has remained resilient, and much of the data points towards continued improvement.

Plan Legislative and Regulatory Update

Final Rule Regarding Changes to 2023 Form 5500 Issued

On February 23rd, 2023, the Department of Labor (“DOL”), Internal Revenue Service (“IRS”), and the Pension Benefit Guaranty Corporation (“PBGC”) announced modifications to the 2023 Form 5500 and Form 5500-SF.¹ Below are a few of the most significant changes:

- **A change to the participant counting methodology for Defined Contribution (“DC”) plans.** Previously, the methodology used to determine whether a plan qualified as a “large” or “small” plan for filing Form 5500 was based on the total number of employees eligible to participate in the plan, including employees not actively contributing and without an account balance in the plan. Effective January 1, 2023, when calculating the participant count, plan sponsors will now only need to consider participants (active and terminated) with an account balance. As a result, some plans that were previously required to complete an audit will now qualify for the small plan exemption.
- **Consolidated reporting for certain plan types and improved reporting for multiple employer plans (“MEPs”) and pooled employer plans (“PEPs”).**
- **Technical adjustments to align with SECURE 2.0.** These include adjustments for 403(b) MEPS including PEPs, minimum required distributions, and audit requirements for plans in defined contribution group arrangements.
- **Break-out reporting on admin expenses, addition of selected compliance questions, further improvements, and technical adjustments related to annual rollover of forms and instructions.**

Action Item: Plan sponsors should be aware of these changes and review with their Recordkeeper and/or third-party administrators to ensure timely and accurate filing of Form 5500.

Committee Approves Bill Allowing CITs in 403(b)s

On May 24th, 2023, the House Financial Services Committee approved an amended bill that would allow Collective Investment Trusts (“CITs”) in 403(b) plans.² The bill, [Retirement Fairness for Charities and Educational Institutions Act](#) (H.R. 3063), was approved on a bipartisan 35 to 12 vote and sponsored by Rep. Frank Lucas, R-Okla. It will now move to the full House of Representatives for consideration

CITs have long been allowed in 401(k) plans and are growing quickly in use, especially in large retirement plans. While they offer the benefit of lower fees, they are often less transparent as they have no tickers and are not regulated by the Security and Exchange Commission (“SEC”). Previously, the SECURE 2.0 Act had amended the Internal Revenue Code to permit these investments in 403(b) plans, but changes needed to the security law were not ultimately included in the final bill.

Action Item: 403(b) plan sponsors, if you are interested in more information, please contact your NWCM advisor.

IRS Proposes Rule for Retirement Plan Forfeitures

On February 27th, 2023, the IRS proposed a [rule](#) on the use of forfeitures in retirement plans.³ In the proposal, the IRS clarifies that forfeitures can be used for the following:

- Paying plan administrative expenses
- Reducing employer contributions under the plan
- Increasing benefits in other participants’ accounts in accordance with plan terms

The regulation also requires that forfeitures be used no later than 12 months after the close of the plan year in which the forfeitures are incurred. The current guideline requires that forfeitures be used within the same plan year in which they occurred. This new rule is proposed to become effective for plan years beginning on or after January 1, 2024.

Action Item: If the rule is finalized, plan sponsors must ensure their plan includes the required language regarding forfeitures and are following proper forfeiture procedures.⁴

SECURE 2.0 Update

! SECURE 2.0 Mandatory Roth Catch-up Contributions

Beginning January 1, 2024, retirement plan participants earning more than \$145,000 will be required to make catch-up contributions as Roth contributions. To continue offering catch-up contributions, plans that currently do not allow Roth contributions will be required to add a provision allowing Roth contributions.¹ Failure to comply with this requirement will result in the elimination of catch-up contributions for all participants, regardless of their wages. This requirement affects 401(k), 403(b), and governmental 457(b) plans.

On June 22, 2023, the American Retirement Association, the American Benefits Council, NAGDCA, and numerous other organizations sent a letter to Congress requesting a two-year delay for the Roth catch-up requirement in SECURE 2.0. They argue that the current 2024 deadline does not provide sufficient time for plans to comply. If the delay is not granted, they propose that the IRS refrain from imposing taxes, penalties, or sanctions for noncompliance with the new rule until January 1, 2026.²

Action Item: Plans that currently do not allow Roth should contact their Recordkeeper to add a Roth provision as soon as possible, in order to continue offering catch-up contributions.

IRS Issues Guidance for SECURE 2.0 Self-Correction Provisions

On May 25th, 2023, the Internal Revenue Service (“IRS”) released additional [guidance](#) on the expanded availability of self-correction made available in the SECURE 2.0 Act.³ SECURE 2.0, which passed in December 2022, sought to expand self-correction availability when plans (or IRAs) fail compliance testing.

This guidance provided clarity on the following items:

- **When self-correction is not available to plan sponsors.** These include significant failures in terminated plans and failure to timely adopt an initial plan document, among several others.
- **The timeframe that self-corrections must be made after a failure is found.** SECURE 2.0 requires that eligible inadvertent failures be corrected within a “reasonable period” after the failure is discovered.
- **The documentation needed for self-correction.** SECURE 2.0 does not provide what documentation is needed; however, the IRS stresses requirements already exist under pre-SECURE 2.0 applicable law.
- **Certain prior restrictions no longer apply.** The IRS confirmed that four previous restrictions, including the completion deadline for significant failure corrections, no longer apply.
- **Several other items.** The IRS provided clarification on various items, including the availability and functioning of expanded self-correction and its application for IRA custodians.

The IRS is accepting comments on the new correction rules until August 23rd, 2023.

Action Item: Plan sponsors should work with their recordkeepers and other service providers to ensure compliance with the implementation of SECURE 2.0.

SECURE 2.0 Implementation Update

SECURE 2.0 introduced several new optional plan design choices, some of which were immediately available upon the bill's passage.

While plan sponsors may be eager to evaluate potential plan design changes, most recordkeepers are still in the process of updating their systems and administrative procedures to accommodate these changes. Additionally, many recordkeepers are awaiting further guidance and accessing plan sponsor interest before making certain optional provisions available on their platforms.

NWCM will continue monitoring your Recordkeeper's operational readiness and will provide additional details as they become available.

NWCM's SECURE 2.0 Guide

We have provided our SECURE 2.0 table on the following pages summarizing the details of several key provisions.

For up-to-date retirement industry news check out our social media pages, which are linked below.

1. Rowland, Claire P. Claire E. Bouffard, Matthew H. Hawes. R. Randall Tracht. "SECURE Act 2.0 Catches Up to Roth". Morgan Lewis, 5 January 2023.

2. Sullivan, John. "ARA, Major Organizations Urge Congress to Delay Roth Catch-Up Requirement". NAPA, 29 June 2023.

3. Daines, Peter. R. Sterling Parkinson. "IRS Issues SECURE 2.0 Guidance on Expanded Availability of Self-Correction". JDSUPRA, 31 May 2023.

KEY PROVISIONS	SECURE 2.0: FINAL BILL	EFFECTIVE DATE	APPLICABLE PLANS & EXCLUSIONS	OPTIONAL OR MANDATORY
SUMMARY	On December 23, 2022, the final version of Secure Act 2.0 was passed by Congress. The bill was signed into law on December 29, 2022.			
ROTH CATCH UP CONTRIBUTIONS	All catch-up contributions must be made as Roth contributions for participants whose wages for the preceding calendar year from the employer sponsoring the plan exceed \$145,000 (indexed).	Tax years beginning after December 31, 2023.	401(k), 403(b), and governmental 457(b) plans. Does not apply to SIMPLE IRAs or SEP plans.	Mandatory except for eligible participants whose prior year wages do not exceed \$145,000 (indexed for inflation).
INCREASED CATCH UP LIMITS	Expands the catch-up limit to \$10,000 for individuals age 60, 61, 62 and 63.	Tax years beginning after December 31, 2024.	401(k), 403(b), and governmental 457(b) but can't be used in addition to 457(b) special catch-up.	Optional provision.
REQUIRED MINIMUM DISTRIBUTIONS	Raises the RMD age to 73 starting in 2023 and 75 in 2033. Excise taxes for RMD failures will decrease from 50% to 25%, and to 10% if corrected promptly. Removes the RMD barriers for life annuities.	Distributions made after December 31, 2022, for individuals who attain age 72 after that date.	401(a), 401(k), 403(b), 457(b) plans, and traditional IRAs.	Mandatory provision.
STUDENT LOANS	Allows employers to treat student loan payments as elective deferrals for purposes of matching contributions.	Plan years after December 31, 2023.	401(k), 403(b), governmental 457(b) plans, and SIMPLE IRAs.	Optional provision.
MATCHING ROTH CONTRIBUTIONS	Allows plans to permit employees to elect that matching contributions be treated as Roth contributions.	Contributions made after the date of enactment (December 31, 2022).	401(k), 403(b), and governmental 457(b) plans.	Optional provision.
SMALLER EMPLOYER STARTUP CREDIT	Enhances the credit for small employer retirement plan startup costs.	Tax years beginning after December 31, 2022.	Employers with up to 50 employees (phased out for employers with between 51 and 100 employees).	N/A
SAVER'S CREDIT	Enhances the Saver's Credit by simplifying the credit rate.	Tax years beginning after December 31, 2026.	Participants below the AGI threshold are eligible. Those under the age of 18, full-time students, nonresident aliens, or anyone who can be claimed as a dependent are ineligible.	N/A
RETIREMENT LOST & FOUND	Requires that the Treasury department establish a retirement savings "lost and found" database, managed by the Department of Labor, to help participants find lost benefits.	Must be created no later than two years after the date of enactment (December 31, 2022).	Applies to tax-qualified defined benefit and defined contribution plans subject to ERISA.	N/A
LONG-TERM PART-TIME WORKERS	Reduces the service requirement for part-time workers from three years to two (two consecutive 12-month periods during each of which the employee has at least 500 hours of service).	Generally effective for plan years after December 31, 2024.	ERISA 401(k) and ERISA 403(b) plans. Does not apply to employees subject to collective bargaining or nonresident aliens. The 12-month period beginning before January 1, 2023, is not taken into account.	Mandatory provision.
MANDATORY AUTO-ENROLLMENT	Requires mandatory auto-enrollment for new plans, with a default rate between 3% and 10%, increasing 1% each year to at least 10%, but not more than 15%.	Plan years after December 31, 2024	New 401(k) and 403(b) plans. Existing plans, new businesses (less than 3 years old), small businesses (less than 10 employees), and government plans are exempt.	Mandatory provision.
SMALL SUM DISTRIBUTIONS	Raises the limit on mandatory cash-out distributions for terminated participants from \$5,000 to \$7,000.	Distributions after December 31, 2023.	401(a), 401(k), 403(b), and governmental 457(b) plans.	Optional provision.
EMERGENCY SAVINGS	Allows for the creation of pension-linked emergency savings accounts up to \$2,500.	Plan years after December 31, 2023.	401(k), 403(b), and governmental 457(b) plans.	Optional provision.
EMERGENCY WITHDRAWALS	Allows workers to withdraw up to \$1,000 from their retirement account, every three years, to cover emergency expenses (plans may rely on employee's written self-certification), with the option to repay the distribution within 3 years.	Distributions after December 31, 2023.	401(a), 401(k), 403(b), governmental 457(b) plans and traditional IRAs.	Optional provision.

KEY PROVISIONS (CONTINUED)	SECURE 2.0: FINAL BILL	EFFECTIVE DATE	APPLICABLE PLANS & EXCLUSIONS	OPTIONAL OR MANDATORY
DOMESTIC ABUSE	Victims of domestic abuse would not face the 10% penalty for withdrawing up to \$10,000 from their retirement savings (or 50% of the account balance, whichever is less).	Distributions after December 31, 2023.	401(k) and 403(b) plans (hardship withdrawals); governmental 457(b) plans (unforeseeable emergency withdrawals)	N/A
"FIRST DAY OF THE MONTH" REQUIREMENT	Eliminates the "first day of the month" requirement for governmental section 457(b) plans, allowing 457(b) elections to be made any time prior to the compensation being deferred is available.	Tax years beginning after the date of enactment (December 31, 2022).	Governmental Section 457(b) plans.	Mandatory provision.
DE MINIMIS INCENTIVES	Allows for small immediate financial incentives for contributing to a plan (e.g., gift cards). The incentives may not be paid for from plan assets.	Plan years beginning after the date of enactment (December 31, 2022).	401(k) and 403(b) plans.	Optional provision.
SELF-CERTIFICATION RULES	Allows plan sponsors to rely on an employee's self-certification for hardship distributions.	Plan years beginning after the date of enactment (December 31, 2022).	401(k) and 403(b) plans (hardship withdrawals); governmental 457(b) plans (unforeseeable emergency withdrawals).	Optional provision.
REPAYMENT OF QBADS	Allows repayment of QBAD (qualified birth and adoption) distributions over a 3-year period. For prior distributions, the repayment period ends December 31, 2025.	Plan years beginning after 2019.	401(a), 401(k), 403(b), and governmental 457(b) plans and traditional IRAs.	Optional provision.
EASING DISCLOSURE REQUIREMENTS FOR UNENROLLED PARTICIPANTS	Eligible participants who are not contributing and do not have a balance are no longer required to be provided most participant disclosures as long as they have received an SPD and an annual reminder notice of their eligibility.	Plan years beginning after December 31, 2022.	401(a), 401(k), 403(b), and governmental 457(b) plans.	N/A
STARTER 401(K)S	Creates a "starter 401(k) deferral-only arrangement" and a "safe harbor 403(b) plan" which aims to make it easier for small business to offer retirement plans. Under this provision, small businesses are provided a safe harbor for offering retirement plans. Annual contributions for these starter plans would be limited to \$6,000.	Plan years beginning after December 31, 2022.	401(k) and 403(b) plans.	N/A
DISASTER RELIEF	Provides permanent rules allowing for the use of up to \$22,000 to be distributed from employer retirement plans in the case of disaster.	Disasters occurring on or after January 26, 2021.	401(a), 401(k), 403(b), or governmental 457(b) plan or a traditional IRA.	Mandatory provision.
DISTRIBUTIONS TO TERMINALLY ILL PARTICIPANTS	The 10% additional tax for early distributions will not apply to distributions to a terminally ill individual.	Distributions after December 31, 2023.	401(k) and 403(b) plans (hardship withdrawals); governmental 457(b) plans (unforeseeable emergency withdrawals)	N/A
AUTOMATIC PORTABILITY OF ROLLOVERS	Allows for the automatic rollover of a participant's IRA to a new employer plan unless the participant affirmatively elects otherwise.	Transactions occurring one year after the date of enactment (December 31, 2022).	401(a), 401(k), 403(b), and governmental 457(b) plans, SEPs, and SIMPLE plans all with less than 100 employees.	Optional provision.
403(B) MULTIPLE EMPLOYER PLANS	Allows for the creation of multiple employer 403(b) plan arrangements.	Plan years beginning after December 31, 2022.	403(b) plans.	Optional provision.
403(B) COLLECTIVE INVESTMENT TRUSTS	Allows 403(b) plan participation in Collective Investment Trusts (CITs). However, the necessary corresponding security law changes have not yet been made.	Amounts invested after date of enactment (December 31, 2023). Security law issues will need to be addressed before CITs are a viable option for 403(b) plans.	403(b) plans.	Optional provision.

Please refer to the Disclosure section for additional details regarding performance calculation methodology and other disclosures.

Performance information is calculated based on monthly performance values as provided by Morningstar or directly from the investment provider.

Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert.

Maintain: A total score ranging from 45 - 100 points indicates that the fund has met the investment monitoring criteria

Watch: A total score less than 45 points indicates that the fund has not met the investment monitoring criteria and has been placed on the Watch List.

Investments on the watch list continue to be monitored according to investment methodology to determine the current and future level of suitability and its purpose in the context of the overall portfolio. The plan will be notified of any potential recommendations or actions that should be considered regarding the status of the funds on the watch list.

Replace: It is suggested that some action be taken because the fund has been on the watch list for 99 quarters or more.

Please review additional disclosures on Investment monitoring section and disclosures at end of the report.

Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert.

Pass, watch, review statuses are based on thresholds defined, administered and reviewed by the advisor or advisor's home office. Each individual fund will be scored based upon monitoring criteria and respective thresholds. The amount of points that a fund earns for passing the threshold for a given criterion depends on the weighting of that criterion in the overall scoring methodology. The points earned for each criterion are totaled to determine whether a fund is classified as "Pass", "Watch" or "Review". Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert. Investments on the watch list continue to be monitored according to investment methodology to determine the current and future level of suitability and its purpose in the context of the overall portfolio. The plan will be notified of any potential recommendations or actions that should be considered regarding the status of the funds on the watch list. Please review additional disclosures on Investment monitoring criteria definitions and other disclosures at end of the report. Indices cannot be invested in directly. Unmanaged index returns assume reinvestment of any and all distributions. Please see disclosures for benchmark definitions, blended benchmark calculation methodology and other disclosures.

Comments:

Alger Spectra returned 13.7% for the trailing quarter compared to 12.5% for its benchmark (the Russell 3000 Growth). For the trailing year, the fund returned 23.0% compared to the benchmark's 26.6%. The largest impacts on the fund's positive relative return this quarter were the under-allocation to consumer staples, and security choices within technology and health care. Leading contributors were household names like NVIDIA, Microsoft, and Amazon. On the other hand, MercadoLibre and Natera were the leading detractors. Looking forward, the fund's managers continue to observe themes which they believe create attractive investment opportunities, such as corporations digitizing their operations, cloud computing, and artificial intelligence. The fund's performance is being closely monitored by our investment committee. Though the fund beat the benchmark this quarter, it has struggled since 2020 and continues to remain on Watch, scoring 8 out of 100 under our scoring methodology. As of the committee meeting held on June 15th, 2023, the County has decided to remove this fund from the lineup.

Comments:

The Alger Small Cap Focus fund returned 1.4% in Q2 2023, compared to 7.1% for its benchmark (the Russell 2000 Growth TR USD). For the trailing year, the fund returned 5.7% compared to 18.5% for the benchmark. The fund's relative underperformance this quarter was attributable to poor stock selection in the technology and industrials sectors, while an underweight position in consumer discretionary aided performance. The benefit from the fund's overweight position in health care was offset by poor stock selection within the sector. Notable underperformers in the health care sector included Natera Inc and Repligen Corp. Mercury Systems Inc, an aerospace and defense technology company, was the leading detractor this quarter. Mercury saw a significant drop in its share price after the company announced it was appointing an interim president and CEO following an unsuccessful search for a buyer. In terms of sector allocation, health care remains the fund's largest overweight. Looking forward, management continues to prioritize businesses with robust cash flow generation and solid balance sheets, emphasizing low debt levels as a key criteria for potential investments. Management is particularly interested in science-based companies, a reflection of the fund's overweight in health care. The fund scores a 10 under our scoring methodology and remains on watch. As of the committee meeting held on June 15th, 2023, the County has decided to remove this fund from the lineup.

Comments:

Invesco Developing Markets returned -0.2% in Q2 2023 compared to 0.9% for its benchmark (the MSCI Emerging Markets Index). For the last 12 months, the fund returned 11.7% compared to 1.7% for the benchmark. Indian, South Korean, and Taiwanese investments were major negatives this quarter, with performance also being hurt by an overweight allocation in consumer discretionary. By individual stock, overweight positions in H World Group and Yum China Holdings, both Chinese consumer discretionary stocks, subtracted from relative performance, though overall the fund was underweight China. In general, Chinese equities were negatively impacted by investor concern over escalating political tensions between the United States and China. On a positive note, the fund's financial equity selection was a major boon for relative performance. For example, the leading contributor was Nu Holdings Ltd, a financial company which earns most of its revenue by providing digital banking services in Brazil. Management, led by Justin Leverenz, believes that the current market environment favors those with an idiosyncratic approach and rewards genuine imagination and creativity in unearthing the rare breed of extraordinary companies. This quarter the fund's score fell to 33 (from 63) under NWCW's methodology and continues to be on Watch due to long-term underperformance. We will continue to monitor the fund closely.

Watch: Orange, Review: Red, Proposed Additions: Green, Proposed Recommendations: Blue.

Comments:

Metropolitan West Total Return Bond returned -1.3% for the trailing quarter compared to -0.8% for its benchmark (the BBgBarc US Agg Bond Index). For the trailing year, the fund returned -1.4% compared to -0.9% for the benchmark. The fund's longer duration versus the benchmark was again the primary headwind for performance (7.13 yrs versus 6.31 yrs). An overweight to high yield credit and securitized products also detracted from performance. An overweight to residential mortgage backed securities (MBS) boosted relative returns as both agency and non-agency MBS benefitted from reduced volatility in the second quarter, and from increased demand. Incremental additions in the agency space during bouts of technical weakness resulted in a bit of a drag on performance, along with the underweight to Ginnie Mae issues. Agency MBS represents a sizable overweight given the government-guaranteed nature, strong liquidity, and historically attractive spreads. Exposure to CMBS has been trimmed in recent months, with current holdings focused on higher quality issues and selected single-asset, single-borrower structures and underlying properties that the team believes are likely to weather a looming correction facing the sector. Finally, asset backed securities (ABS) exposure currently focuses on collateralized loan obligations (CLOs) and a variety of smaller collateral types (solar, single-family rentals, auto residuals, etc.). The fund scores 23 under NWCM's scoring methodology.

Fund Fact Sheets

Alger Spectra Y | ASPYX

Large Growth | Status: Watch

Investment Objective

The investment seeks long-term capital appreciation. The fund invests primarily in the equity securities of companies of any size that the manager believes demonstrate promising growth potential. Equity securities include common or preferred stocks that are listed on U.S. or foreign exchanges. It may invest a significant portion of its assets in securities of companies conducting business within a single sector, including the information technology, consumer discretionary, and healthcare sectors.

Equity Index Fund M

Large Blend | Status: Maintain

Investment Objective

The Equity Index Fund (the "Fund") is an index fund that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of a particular index. The Fund shall be invested and reinvested in a portfolio of equity securities with the objective of approximating as closely as practicable the capitalization weighted total rate of return of that segment of the U.S. market for publicly traded equity securities represented by the larger capitalized companies. The criterion for selection of investments shall be the Benchmark listed herein.

Columbia Dividend Income Inst3 | CDDYX

Large Value | Status: Maintain

Investment Objective

The investment seeks total return, consisting of current income and capital appreciation. The fund invests at least 80% of its net assets (including the amount of any borrowings for investment purposes) in a diversified portfolio of income-producing (dividend-paying) equity securities, which will consist primarily of common stocks but also may include preferred stocks and convertible securities. It invests principally in securities of companies believed to be undervalued but also may invest in securities of companies believed to have the potential for long-term growth. The fund may invest in companies that have market capitalizations of any size.

T. Rowe Price Mid-Cap Growth I | RPTIX

Mid-Cap Growth | Status: **Maintain**

Investment Objective

The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its net assets (including any borrowings for investment purposes) in a diversified portfolio of common stocks of mid-cap companies whose earnings T. Rowe Price expects to grow at a faster rate than the average company. The advisor defines mid-cap companies as those whose market capitalization falls within the range of either the S&P MidCap 400® Index or the Russell Midcap® Growth Index.

BlackRock Mid Cap Equity Index Fund M

Mid-Cap Blend | Status: **Maintain**

Investment Objective

'The Mid Capitalization Equity Index Fund M (the "Fund") is an index fund that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of a particular index. The Fund shall be invested and reinvested in a portfolio of equity securities with the objective of approximating as closely as practicable the capitalization weighted total rate of return of that segment of the U.S. market for publicly traded equity securities represented by the medium capitalized companies. The criterion for selection of investments shall be the Benchmark listed herein.'

Alger Small Cap Focus Y | AOFYX

Small Growth | Status: Watch

Investment Objective

The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies that, at the time of purchase of the securities, have total market capitalization between (1) the higher of (a) \$5 billion or (b) the company in either the Russell 2000 Growth Index or the MSCI USA Small Cap Index with the highest capitalization, and (2) the company in either index with the lowest capitalization, at any time during the most recent 12-month period as reported by either index. Both indexes are broad-based indexes of small capitalization stocks.

Columbia Small Cap Value II Inst3 | CRRYX

Small Value | Status: Maintain

Investment Objective

The investment seeks long-term capital appreciation. Under normal circumstances, the fund invests at least 80% of its net assets (including the amount of any borrowings for investment purposes) in equity securities of companies that have market capitalizations in the range of the companies in the Russell 2000® Value Index at the time of purchase that the fund's investment manager believes are undervalued and have the potential for long-term growth. It may invest up to 20% of its total assets in foreign securities, including depositary receipts. The fund normally invests in common stocks and also may invest in real estate investment trusts.

T. Rowe Price Overseas Stock I | TROIX

Foreign Large Blend | Status: **Maintain**

Investment Objective

The investment seeks long-term growth of capital through investments in the common stocks of non-U.S. companies. The manager expects to invest significantly outside the U.S. and to diversify broadly among developed market and, to a lesser extent, emerging market countries throughout the world. It normally invests at least 80% of its net assets (including any borrowings for investment purposes) in non-U.S. stocks and at least 65% of its net assets in stocks of large-cap companies.

Vanguard Developed Markets Index Admiral |VTMGX

Foreign Large Blend | Status: **Maintain**

Investment Objective

The investment seeks to track the performance of the FTSE Developed All Cap ex US Index. The fund employs an indexing investment approach designed to track the performance of the FTSE Developed All Cap ex US Index, a market-capitalization-weighted index that is made up of approximately 4,006 common stocks of large-, mid-, and small-cap companies located in Canada and the major markets of Europe and the Pacific region. The Advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Invesco Developing Markets R6 | ODVIX

Diversified Emerging Mkts | Status: **Watch**

Investment Objective

The investment seeks capital appreciation. The fund mainly invests in common stocks of issuers in developing and emerging markets throughout the world. Under normal market conditions, it will invest at least 80% of its net assets, plus borrowings for investment purposes, in equity securities of issuers whose principal activities are in a developing market, i.e. are in a developing market or are economically tied to a developing market country. The fund will invest in at least three emerging/developing markets countries.

Fidelity Advisor® Real Estate Income I | FRIRX

Real Estate | Status: **Maintain**

Investment Objective

The investment seeks higher than average income, and capital growth is the secondary objective. The fund normally invests primarily in preferred and common stocks of REITs, debt securities of real estate entities, and commercial and other mortgage-backed securities, with an emphasis on lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds). It invests at least 80% of assets in securities of companies principally engaged in the real estate industry and other real estate related investments. The fund invests in domestic and foreign issuers.

BlackRock U.S. Debt Index W

Intermediate Core Bond | Status: **Maintain**

Investment Objective

The Fund is an 'index fund' that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of its Underlying Index (defined below). The Fund shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the total rate of return of the market for debt securities as defined by the Bloomberg Barclays U.S. Aggregate Bond Index (the 'Underlying Index'). BlackRock Institutional Trust Company, N.A. ('BTC') uses a 'passive' or indexing approach to try to achieve the Fund's investment objective. Unlike many funds, the Fund does not try to outperform the index it seeks to track and does not seek temporary defensive portions when markets decline or appear overvalued. BTC uses a representative sampling indexing strategy to manage the Fund.

Metropolitan West Total Return Bd Plan | MWTSX

Intermediate Core-Plus Bond | Status: Watch

Investment Objective

The investment seeks to maximize long-term total return. The fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets in investment grade fixed income securities or unrated securities determined by the Adviser to be of comparable quality. Up to 20% of the fund's net assets may be invested in securities rated below investment grade or unrated securities determined by the Adviser to be of comparable quality. The fund also invests at least 80% of its net assets, plus any borrowings for investment purposes in fixed income securities it regards as bonds.

Vanguard Total Intl Bd Idx Admiral™ | VTABX

Global Bond-USD Hedged | Status: Maintain

Investment Objective

The investment seeks to track the performance of a benchmark index that measures the investment return of non-U.S. dollar-denominated investment-grade bonds. The fund employs an indexing investment approach designed to track the performance of the Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index (USD Hedged). This index provides a broad-based measure of the global, investment-grade, fixed-rate debt markets. It is non-diversified.

Empower Lifetime 2030 Trust

Target-Date 2030 | Status: **Maintain**

Investment Objective

The investment objective of each Fund is to seek capital appreciation and income. After the target year noted in the name of the Fund, the investment objective is to seek income and secondarily, capital growth. The Lifetime Conservative Trust series are generally expected to pursue a more conservative allocation strategy relative to the Lifetime Trust series whereas the Lifetime Trust series are generally expected to pursue a more allocation strategy for a particular target date.

Glossary and Disclosures

Glossary

Return: the money made or lost on an investment over some period of time. A return can be expressed nominally as the change in dollar value of an investment over time.

Standard Deviation (Std. Dev.): measures the dispersion of a dataset relative to its mean. It is calculated as the square root of the variance. Standard deviation is used as a measure of a relative riskiness of an asset.

Sharpe Ratio (Sharpe): is used to help investors understand the return of an investment compared to its risk. The ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

Average Manager Tenure: the length of time that an investment manager has been at the helm of an investment fund.

Expense Ratio: measures how much of a fund's assets are used for administrative and other operating expenses. An expense ratio is determined by dividing a fund's operating expenses by the average dollar value of its assets under management (AUM).

Up Capture: the statistical measure of an investment manager's overall performance in up-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen.

Down Capture: the statistical measure of an investment manager's overall performance in down-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has dropped.

Excess Return: returns achieved above and beyond the return of a proxy. Excess returns will depend on a designated investment return comparison for analysis. The riskless rate and benchmarks with similar levels of risk to the investment being analyzed are commonly used in calculating excess return.

Tracking Error: the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark. This is often in the context of a hedge fund, mutual fund, or exchange-traded fund (ETF) that did not work as effectively as intended, creating an unexpected profit or loss.

Batting Average: a statistical technique used to measure an investment manager's ability to meet or beat an index. The higher the batting average, the better. The highest number possible average would be 100% while the lowest is 0%.

R-Squared (R-Sqrd): measures how closely the performance of an asset can be attributed to the performance of a selected benchmark index. R-squared is measured on a scale between 0 and 100; the higher the R-squared number, the more correlated the asset is to its benchmark.

Disclosures

Important Disclosure Information

This report is for informational purposes only, and attempts to provide only broad guidelines and information that can be used to help you shape your employee retirement benefit plan. The information will not assess the suitability or give assurance about the potential value of any particular investment. Certain securities may not be suitable for all investors.

All data included in this report, including, but not limited to charts/graphs, plan level data and investment data is dependent upon the quality and accuracy of information supplied by the plan, service providers, investment firms, reporting companies and other sources. While the information is believed to be true and accurate, no guarantee is made to its completeness or accuracy. Plan Sponsors compare the account statements received from their record keeper or Custodian with any statements received from ERS and/or the advisor associated with their plan (if applicable). Please contact ERS and/or your Advisor if you believe there are any material discrepancies between your custodial statement and any other statements received.

©2023 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

Risk-return calculations done by Envestnet Retirement Solutions (ERS) technology based on monthly returns received from Morningstar and/or investment provider.

Investors should consider the investment objectives, risks, charges and expenses before investing. The prospectuses (for Investment Company Securities) and disclosure documents (for Collective Investment Trust options) contain this and other important information. These documents are available through you plan's Record Keeper. Read carefully before investing.

Past performance is no guarantee of future results. Performance data quoted represents past performance. Investment return and principal will fluctuate so that an investor's shares or units, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information quoted.

For additional information made publicly available by the fund's sponsor, including performance data to the most recent month-end, please visit the fund's Website. Performance quoted is at net asset value (NAV), reflects the reinvestment of dividends and capital gains, and is net of expenses. Returns do not include the effects of maximum sales charge, if any, as sales charges are waived for qualified plans. If the effects of sales charges were included, returns would be lower. In certain circumstances, a back-end sales charge or redemption fee may be assessed upon redemption of shares within a particular timeframe. Please refer to the prospectus, disclosure document (for Collective Investment Trust options) and/or statement of additional information for specific details. *An investment in the money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.*

For certain investment options, the returns shown reflect fee subsidies and waivers, without which the results would have been lower than noted. These fee subsidies and waivers may not continue to remain in effect in the future. Please note that certain funds will charge a redemption fee for short-term trading. The returns shown do not reflect short-term trading fees, which if included would reduce returns. Investments in target date funds are subject to the risks of their underlying funds. The year in a target date fund name refers to the approximate year (the target date) when an investor in the fund would retire and leave the workforce. Target date funds will gradually shift their emphasis from more aggressive investments to more conservative ones based on the indicated target date.

Disclosures

An investment in a target date fund is not guaranteed at any time, including on or after the target date. Target date fund suggestions are based on an estimated retirement age of approximately 65. Should the investor choose to retire significantly earlier or later, he/she may want to consider a fund with an asset allocation more appropriate to his/her situation. The stable value funds identified, if any, are structured either as collective investment trust funds ("CITs") or insurance company general or separate accounts, but are not mutual funds (as defined under the Investment Company Act of 1940, as amended). For detailed information about these products please see the applicable disclosure document related to the product in question. Investments identified as Separately Managed Accounts ("SMA"), if any, are not registered mutual funds. SMAs are privately managed investment accounts that have various investment objectives, differing degrees of risk, and utilize varying investment strategies. Detailed information on each SMA available to your Plan is available directly from the Registered Investment Advisor with whom the Plan Sponsor has contracted to manage the SMA.

Asset allocation and market value are subject to change. Indices are unmanaged and are unavailable for direct investment.

The technology solution for the proposal is developed by Envestnet Retirement Solutions, LLC ("ERS"). ERS is also a registered investment advisor with the U.S. Securities Exchange Commission. However, any advisory solutions are provided under a separate legal contract. Unless otherwise indicated, ERS is not affiliated with the investment advisory firm listed in this report. ERS is a wholly owned subsidiary of Envestnet, Inc.

Unless otherwise indicated, ERS is not affiliated with the entities listed in this report. Envestnet Retirement Solutions, LLC is a majority owned subsidiary of Envestnet, Inc., and Envestnet Asset Management, Inc., d/b/a Envestnet | PMC is a wholly owned subsidiary of Envestnet, Inc.

Blended Benchmark Calculation Methodology

The Blended Benchmark Performance is calculated based on the historical performance of the benchmark assigned to each underlying investment in the Plan, weighted based on the asset allocation as of the report date. Returns are hypothetical and do not reflect actual benchmark returns of the plan as asset allocations of the underlying investments and the benchmarks assigned to each may have changed throughout the history of the periods reported. In the event that a benchmark does not have performance for any period, that benchmark is not used in the calculation and the total assets to calculate the weighted average are reduced accordingly.

Plan Category Calculation Methodology

The Plan Category Return is calculated based on the historical performance of the investment category (Peer Group) assigned to each underlying investment that is assigned to the category, weighted based on the asset allocation as of the report date. Returns are hypothetical and do not reflect actual category returns of the plan as asset allocations of the underlying investments and the categories assigned to each may have changed throughout the history of the periods reported.

Disclosures

Capital Markets Commentary Disclosure

Certain sections of this commentary contain forward-looking statements that are based on our reasonable expectations, estimates, projections, and assumptions. Forward-looking statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Past performance is not indicative of future results. All indices are unmanaged and investors cannot invest directly into an index. The Dow Jones Industrial Average is a price-weighted average of 30 actively traded blue-chip stocks. The S & P 500 Index is a broad-based measurement of changes in stock market conditions based on the average performance of 500 widely held common stocks. The MSCI EAFE Index is a float-adjusted market capitalization index designed to measure developed market equity performance, excluding the U.S. and Canada. The MSCI Emerging Markets Free Index is a market capitalization-weighted index composed of companies representative of the market structure of 26 emerging market countries in Europe, Latin America, and the Pacific Basin. It excludes closed markets and those shares in otherwise free markets that are not purchasable by foreigners. The Barclays Capital Aggregate Bond Index is an unmanaged market value-weighted index representing securities that are SEC-registered, taxable, and dollar-denominated. It covers the U.S. investment-grade fixed-rate bond market, with index components for a combination of the Barclays Capital government and corporate securities, mortgage-backed pass-through securities, and asset-backed securities. The Barclays Capital U.S. Corporate High Yield Index covers the USD-denominated, non-investment-grade, fixed-rate, taxable corporate bond market. Securities are classified as high-yield if the middle rating of Moody's, Fitch, and S & P is Ba1/BB+/BB+ or below.

Risks

Investing in mutual funds, which are generally intended as long-term investments, involves risk, including the possible loss of principal. It is important to understand that certain types of securities and/or investment strategies employed by mutual funds may expose an investor to additional inherent risks. Investments in foreign securities are subject to special additional risks, including currency risk, political risk, and risk associated with varying accounting standards. Funds invested in emerging markets may accentuate these risks. Sector funds (those funds that invest exclusively in one sector or industry), such as technology or real estate stocks, are subject to substantial volatility due to adverse political, economic, or other developments and may carry additional risk resulting from lack of industry diversification. Non-diversified funds, which invest more of their assets in a single issuer, may experience substantial volatility due to the increased concentration of investments. Funds that invest in small or mid-capitalization companies may experience a greater degree of market volatility, and potential for business failure, than those of large-capitalization stocks and are riskier investments. Bond funds have the same interest rate, inflation, and credit risks as associated with the underlying bonds owned by the fund. Generally, the value of bond funds rises when prevailing interest rates fall and falls when interest rates rise. Funds that invest in lower-rated debt securities, commonly referred to as high yield or junk bonds, have additional risks and may be subject to greater market fluctuations and risk of loss of income and principal (relative to higher-rated securities), due to the lower credit quality of the securities and increased risk of default. Bear in mind that higher return potential is accompanied by higher risk. Although diversification is not a guarantee against loss, it can be an effective strategy to help manage risk. There is no guarantee that a diversified portfolio will outperform a nondiversified portfolio. Diversification does not assure a profit or protect against loss in a declining market. There are no assurances that your investment objectives will be achieved. When viewing performance of an index, keep in mind that indices are unmanaged and are not subject to charges and expenses that may otherwise be applicable to investment options available in your plan. These indices are unavailable for direct investment. Past performance is no guarantee of future results.

Monitoring Report - Executive Summary and Status History - Executive Summary Methodology

The Investment Policy Statement Score is a ranking, from 0 - 100, of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Score is calculated on a quarterly basis for open-end mutual funds, exchange-traded funds, and Separate Accounts. The Score is calculated by first combining open-end mutual fund and ETF databases (data source: Morningstar). Each investment is then evaluated against the individual criterion (factors and thresholds) and point system identified in the Criteria section of this document. Next, the points are totaled and the total for each investment is assigned a passing or failing rating. Investments with fewer than 60 points are automatically given a failing score. A score of 100 is most favorable, and a score of 0 is least favorable. The Score relies upon peer group comparison. Determining an investment's appropriate peer group or asset class is subjective. There are no industry standards for determining a money manager's investment style or peer group, which makes it difficult to track some investments across different databases. Morningstar data is utilized in the calculation of the Score and therefore uses the Morningstar Category as the investment's peer group. To make the peer group analysis meaningful, the data set should be substantial enough to draw comparisons. With that in mind, we require at least a three-year history in order to calculate a Score for the investments in a peer group. Investments within peer groups that do not meet the requirement will not receive a Score. When evaluating Separate Accounts, the combined mutual fund / ETF peer group data is used as the backdrop to rank the Separate Accounts. The Separate Account database is limited in size, and since these products are used interchangeably in the marketplace with mutual funds, the combined mutual fund / ETF peer groups provide a better analysis of the Separate Accounts' data.

Investment Policy Criteria

The Monitoring Report displays fund and benchmark data based on the Investment Policy Criteria selected by the Plan Sponsor. The specific criteria appear in the header and the IPS Rating indicates the number of criteria that have been met in accordance with the Investment Policy Statement.

Morningstar Rating Overall Methodology: Funds are ranked within their categories according to their risk-adjusted return (after accounting for all sales charges and expenses), and stars are assigned such that the distribution reflects a classic bell-shaped curve with the largest section in the center. The 10% of funds in each category with the highest risk-adjusted return receive five stars, the next 22.5% receive four stars, the middle 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. Funds are rated for up to three periods—the trailing three, five, and 10 years and ratings are recalculated each month. Funds with less than three years of performance history are not rated. For funds with only three years of performance history, their three-year star ratings will be the same as their overall star ratings. For funds with five-year records, their overall rating will be calculated based on a 60% weighting for the five-year rating and 40% for the three-year rating. For funds with more than a decade of performance, the overall rating will be weighted as 50% for the 10-year rating, 30% for the five-year rating, and 20% for the three-year rating. The star ratings are recalculated monthly. For multiple-share-class funds, each share class is rated separately and counted as a fraction of a fund within this scale, which may cause slight variations in the distribution percentages. This accounting prevents a single portfolio in a smaller category from dominating any portion of the rating scale. If a fund changes Morningstar Categories, its historical performance for the longer time periods is given less weight, based on the magnitude of the change. (For example, a change from a small-cap category to large-cap category is considered more significant than a change from mid-cap to large-cap) Doing so ensures the fairest comparisons and minimizes any incentive for fund companies to change a fund's style in an attempt to receive a better rating by shifting to another Morningstar Category.

Benchmark Definitions

Russell 3000 Growth TR USD

The index measures the performance of the broad growth segment of the US equity universe. It includes Russell 3000 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 1000 TR USD

The index measures the performance of the large-cap segment of the US equity securities. It is a subset of the Russell 3000 index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership.

Russell Mid Cap Growth TR USD

The index measures the performance of the mid-cap growth segment of the US equity universe. It includes Russell midcap index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

S&P MidCap 400 TR

The index measures the performance of mid-sized US companies, reflecting the distinctive risk and return characteristics of this market segment. It comprises stocks in the middle capitalization range, covering approximately 7% of the of US equity market.

Russell 2000 Growth TR USD

The index measures the performance of small-cap growth segment of the US equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

Russell 2000 TR USD

The index measures the performance of the small-cap segment of the US equity universe. It is a subset of the Russell 3000 and includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

Russell 2000 Value TR USD

The index measures the performance of small-cap value segment of the US equity universe. It includes those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

S&P 500 Sec/Utilities TR USD

The index measures the performance of all those companies held in the S&P 500 index that are classified as a utilities(sector) company using the Global Industry Classification Standard(GICS) system.

Benchmark Definitions

MSCI EAFE NR USD

The index measures the performance of the large and mid cap segments of developed markets, excluding the US & Canada equity securities. It is free float-adjusted market-capitalization weighted.

MSCI EM NR USD

The index measures the performance of the large and mid cap segments of emerging market equity securities. It is free float-adjusted market-capitalization weighted.

S&P United States REIT TR USD

The index measures the performance of investable universe of publicly traded real estate investment trusts domiciled in the United States.

Bloomberg US Agg Bond TR USD

The index measures the performance of investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. It rolls up into other Bloomberg flagship indices, such as the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.

Bloomberg Gbl Agg xUSD Fl Aj RIC TR HUSD

The index measures the performance of the global, investment-grade, fixed rate debt markets, including government, government agency, corporate and securitized non-U.S. fixed income investments - all issued in currencies other than the U.S. dollar and with maturities of more than one year - with the foreign currency exposure of the securities included in the Barclays Global Aggregate ex-USD Float Adjusted RIC Capped Index hedged to the Canadian dollar. It is market capitalization-weighted.

Morningstar Lifetime Mod 2015 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2015. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Lifetime Mod 2020 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2020. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Lifetime Mod 2025 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2025. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Lifetime Mod 2060 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2060. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Category (Peer Group) Classification Definitions

Large Growth, LG

Large-growth portfolios invest in big U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). Most of these portfolios focus on companies in rapidly expanding industries. The market capitalization of large-cap companies may change over time and is not authoritatively defined. While larger companies tend to be less volatile than small- or mid-cap companies, an investor can still lose money when investing in the stocks of large-cap companies.

Large Blend, LB

Large-blend portfolios are fairly representative of the overall U.S. stock market in size, growth rates, and price. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios tend to invest across the spectrum of U.S. industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index. The market capitalization of large-cap companies may change over time and is not authoritatively defined. While larger companies tend to be less volatile than small- or mid-cap companies, an investor can still lose money when investing in the stocks of large-cap companies.

Large Value, LV

Large-value portfolios invest primarily in big U.S. companies that are less expensive or growing more slowly than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow). The market capitalization of large-cap companies may change over time and is not authoritatively defined. While larger companies tend to be less volatile than small- or mid-cap companies, an investor can still lose money when investing in the stocks of large-cap companies.

Mid-Cap Growth, MG

Some mid-cap growth portfolios invest in stocks of all sizes, thus leading to a mid-cap profile, but others focus on midsize companies. Mid-cap growth portfolios target U.S. firms that are projected to grow faster than other mid-cap stocks, therefore commanding relatively higher prices. The U.S. mid-cap range for market capitalization typically falls between \$1 billion-\$8 billion and represents 20% of the total capitalization of the U.S. equity market. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). The market capitalization of mid-cap companies may change over time and is not authoritatively defined. The securities of these companies may be more volatile and less liquid than those of larger companies.

Mid-Cap Blend, MB

The typical mid-cap blend portfolio invests in U.S. stocks of various sizes and styles, giving it a middle-of-the-road profile. Most shy away from high-priced growth stocks, but aren't so price conscious that they land in value territory. The U.S. mid-cap range for market capitalization typically falls between \$1 billion-\$8 billion and represents 20% of the total capitalization of the U.S. equity market. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. The market capitalization of mid-cap companies may change over time and is not authoritatively defined. The securities of these companies may be more volatile and less liquid than those of larger companies.

Morningstar Category (Peer Group) Classification Definitions

Small Growth, SG

Small-growth portfolios focus on faster-growing companies whose shares are at the lower end of the market-capitalization range. These portfolios tend to favor companies in up-and coming industries or young firms in their early growth stages. Because these businesses are fast growing and often richly valued, their stocks tend to be volatile. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small-cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). The market capitalization of small-cap companies may change over time and is not authoritatively defined. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies.

Small Blend, SB

Small-blend portfolios favor U.S. firms at the smaller end of the market-capitalization range. Some aim to own an array of value and growth stocks while others employ a discipline that leads to holdings with valuations and growth rates close to the small-cap averages. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small-cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. The market capitalization of small-cap companies may change over time and is not authoritatively defined. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies.

Small Value, SV

Small-value portfolios invest in small U.S. companies with valuations and growth rates below other small-cap peers. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow). The market capitalization of small-cap companies may change over time and is not authoritatively defined. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies.

Utilities, SU

Specialty-utilities portfolios seek capital appreciation by investing primarily in equity securities of U.S. or non-U.S. public utilities including electric, gas, and telephone-service providers. Specialty funds generally are non-diversified and more susceptible to financial, market, economic or political events affecting the particular issuers and/or industry sectors in which they invest and therefore may be more volatile or risky than less concentrated investments

Foreign Large Blend, FB

Foreign large-blend portfolios invest in a variety of big international stocks. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asia ex- Japan). The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios typically will have less than 20% of assets invested in U.S. stocks. Investments in international markets present special risks including currency fluctuation, the potential for diplomatic and political instability, regulatory and liquidity risks, foreign taxation and differences in auditing and other financial standards.

Diversified Emerging Mkts, EM

Diversified emerging-markets portfolios tend to divide their assets among 20 or more nations, although they tend to focus on the emerging markets of Asia and Latin America rather than on those of the Middle East, Africa, or Europe. These portfolios invest at least 70% of total assets in equities and invest at least 50% of stock assets in emerging markets. Investments in international markets present special risks including currency fluctuation, the potential for diplomatic and political instability, regulatory and liquidity risks, foreign taxation and differences in auditing and other financial standards.

Morningstar Category (Peer Group) Classification Definitions

Real Estate, SR

Specialty-real estate portfolios invest primarily in real-estate investment trusts (REITs) of various types. REITs are companies that develop and manage real-estate properties. There are several different types of REITs, including apartment, factory-outlet, health-care, hotel, industrial, mortgage, office, and shopping center REITs. Some portfolios in this category also invest in real-estate operating companies. Specialty funds generally are non-diversified and more susceptible to financial, market, economic or political events affecting the particular issuers and/or industry sectors in which they invest and therefore may be more volatile or risky than less concentrated investments.

Stable Value, VL

Stable-value portfolios seek to provide income while preventing price fluctuations. The most common stable-value portfolios invest in a diversified portfolio of bonds and enter into wrapper agreements with financial companies to guarantee against fluctuations in their share prices. These wrapper agreements typically provide price stability on a day-to-day basis, thereby insulating each portfolio's net asset value from interest-rate volatility. Therefore, the duration for each of these funds is essentially zero. This category is only used in Morningstar's custom fund and separate account databases. Stable value funds have exposure to financial, market, credit, prepayment and interest rate risks, and may lose value.

Intermediate Core Bond, CI

Intermediate-term bond portfolios invest primarily in corporate and other investment-grade U.S. fixed-income issues and have durations of 3.5 to six years (or, if duration is unavailable, average effective maturities of four to 10 years). These portfolios are less sensitive to interest rates, and therefore less volatile, than portfolios that have longer durations. Bonds with longer maturities tend to be more sensitive to changes in interest rates than debt securities with shorter durations.

Intermediate Core-Plus Bond, PI

Intermediate-term core-plus bond portfolios invest primarily in investment-grade U.S. fixed-income issues including government, corporate, and securitized debt, but generally have greater flexibility than core offerings to hold non-core sectors such as corporate high yield, bank loan, emerging-markets debt, and non-U.S. currency exposures. Their durations (a measure of interest-rate sensitivity) typically range between 75% and 125% of the three-year average of the effective duration of the Morningstar Core Bond Index.

Global Bond-USD Hedged, WH

USD hedged portfolios typically invest 40% or more of their assets in fixed-income instruments issued outside of the U.S. These portfolios invest primarily in investment-grade rated issues, but their strategies can vary. Some follow a conservative approach, sticking with high-quality bonds from developed markets. Others are more adventurous, owning some lower-quality bonds from developed or emerging markets. Some portfolios invest exclusively outside the U.S., while others invest in both U.S. and non-U.S. bonds. Funds in this category hedge most of their non-U.S.-dollar currency exposure back to the U.S. dollar.

Target-Date 2015, TD

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2011-2015) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Morningstar Category (Peer Group) Classification Definitions

Target-Date 2020, TE

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2016-2020) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2025, TG

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2021-2025) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2030, TH

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2026-2030) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2035, TI

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2031-2035) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2040, TJ

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2036-2040) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Target-Date 2045, TK

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2041-2045) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Morningstar Category (Peer Group) Classification Definitions

Target-Date 2050, TN

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2046-2050) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Target-Date 2055, TL

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2051-2055 and beyond) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target date portfolio is part of a series of funds offering multiple retirement dates to investors.

Target-Date 2060, XQ

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the year 2060 and beyond) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target date portfolio is part of a series of funds offering multiple retirement dates to investors.

A Hawkish Pause?

Inflation pulls back on lower energy, food, and used car prices

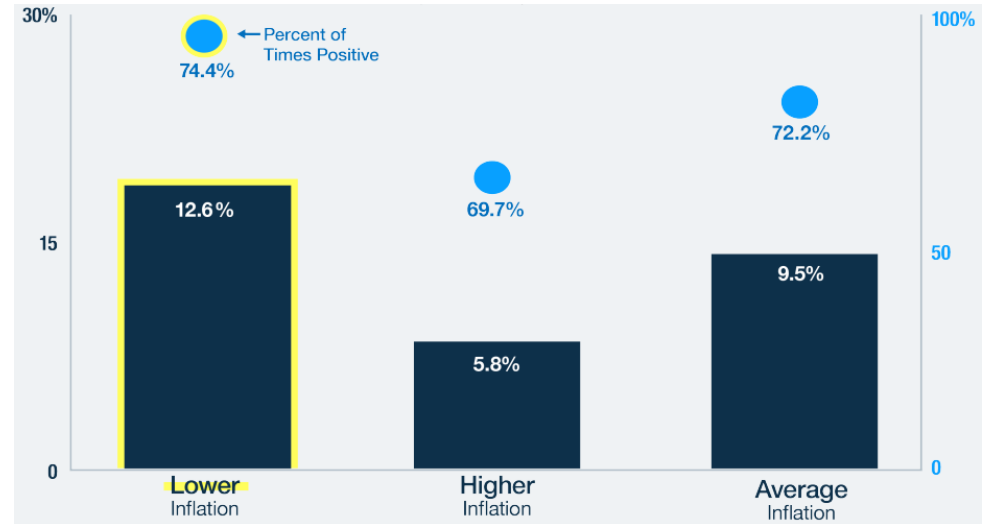

Contributions to CPI Inflation (YOY)

After an aggressive hiking schedule, the Federal Reserve ('the Fed') hinted at a potential end to its tightening cycle. With the Fed funds rate reaching an upper bound of 5.25%—finally surpassing CPI inflation—indications pointed towards a possible conclusion to the rate hikes. Historical patterns suggest that the Fed tends to continue hiking until the Fed funds rate surpasses the CPI inflation, supporting this perspective. However, to the surprise of investors, 12 of the 18 Fed officials projected rates rising at least another half point by the end of the year, pointing to uncertainty on the direction of rates.

Inflation dynamics played a crucial role, with lower energy prices being a significant driver of falling inflation. Recent data also indicated a deceleration in food price inflation. Used car prices declined for several months, and further reductions were anticipated. New vehicle prices also showed signs of decline as improvements were made in the production supply chain. These shifts in inflation, combined with positive economic indicators, raised questions about the duration of high-interest rates set by the Federal Reserve.

S&P 500 Annual Performance Based on How Inflation Does From the Prior Year (1950-2021)

Stock market performance, which suffered due to higher inflation in the previous year, showed signs of improvement. Expectations of lower inflation in 2023 generated an optimistic outlook for investors. Historical data suggested that stocks tend to perform better when inflation is lower than the previous year. The US Leading Economic Index highlighted the pivotal role of the consumer in driving the recovery, while sectors such as housing and manufacturing also demonstrated signs of improvement.

As the economy moves toward normalization, the risks of a recession, which were prevalent in the previous year, have begun to diminish. Headwinds caused by rapid rate hikes gradually dissipated, allowing housing, businesses, and markets to regain stability.

While challenges remained, such as core PCE inflation and progress stagnation in the first half of the year, there was optimism that inflation would decrease in the latter half. This belief was bolstered by the deceleration of shelter inflation, contributing to an overall moderation in inflation levels.

A Hawkish Pause?

The best labor market since the late 1990's

Employment – Population Ratio (25-54 years)

Source: Carson Investment Research, FRED, 05/30/2023
Shaded areas indicate U.S. recessions

Job creation was a notable achievement, with 1.7 million jobs added in the first six months of the year. Surpassing expectations consistently, the economy demonstrated strength and provided a positive surprise to economists and analysts. Unemployment rates stood at a commendable 3.7%, while the prime-age employment-population ratio reached its highest level in over two decades, reaching 80.7%.

While concerns emerged regarding rising credit card debt, closer examination revealed a nuanced situation. Card balances remained relatively stable in the first quarter, alleviating some worries. Disposable income also exhibited healthy growth, increasing at an annualized rate of 10% through May. Debt service costs as a percentage of disposable income remained relatively low at 9.6% in the first quarter of 2023.

Even with this recent data coming through, consumers and manufacturers remain anxious. Consumer sentiment as measured by the University of Michigan Consumer Sentiment Index ended the quarter at 64.4, which is an improvement from a year ago but remains well below the 20-year average of

Source: Carson Investment Research, FRED, As of 5/30/2023. University of Michigan, NAM Manufacturing Outlook, BLS, Past performance does not guarantee future results. All indexes are unmanaged and cannot be invested into directly. Diversification does not ensure a profit or guarantee against a loss. Data as of 6/30/2023.

Debt service much less of a burden now

Percentage of Disposable Personal Income

Source: Carson Investment Research, FRED, 05/30/2023
Shaded areas indicate U.S. recessions

81.8, indicating consumers remain concerned with persistent high prices. Similarly, only 67% of manufacturers are positive about their own company's outlook, which is the lowest since Q3 2020 as companies are finding it difficult to attract and retain talent and struggling to keep up with inflation.

Looking ahead, the headwinds from last year are fading as the economy normalizes. In a nutshell, the consumer has driven the recovery and carried the economy through last year. Even better, as we discussed earlier, consumer indicators have improved over the first half of 2023.

The main risk of a recession last year was due to the Fed raising rates as fast as it did, which adversely impacted housing, financial markets, and business activity. The good news is that these sectors are improving even as consumer strength continues. Additionally, the drag from financial conditions is beginning to ease as the Federal Reserve gets closer to the end of rate hikes and markets rally.

Markets at a Glance

U.S. Equity & Fixed Income Quarterly Performance

% Total Return USD

Trailing Returns

% Total Return USD

U.S. Equities: The S&P 500, representing large cap equities, returned 8.7% in the trailing quarter and returned 19.6% in the past 12 months. Large cap growth outperformed value for the trailing quarter but underperformed for the year, returning 10.6% versus 6.6%, and 18.3% versus 20.0%. Eight of the eleven S&P 500 sectors increased in the trailing quarter. Technology was the best performing sector with a 15.4% gain while Utilities was the worst with a -2.5% return. Small caps returned 3.4% in the last three months and 9.8% in the past year.

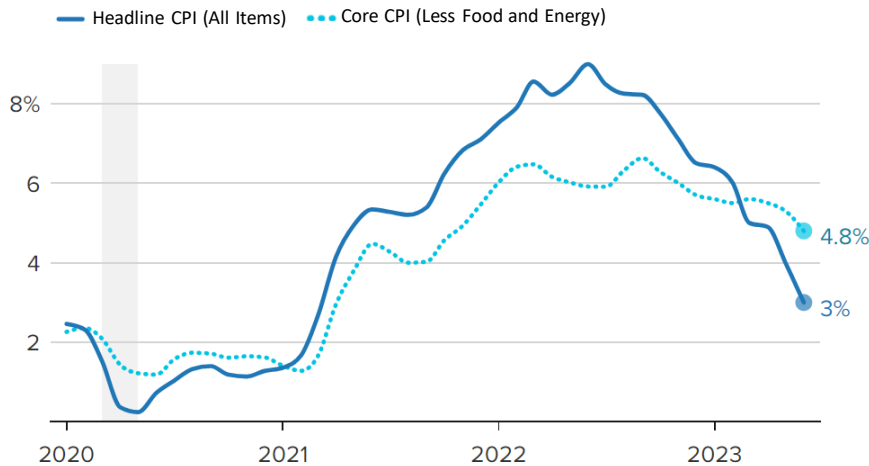

International Equities: The MSCI EAFE benchmark returned 3.0% in the trailing quarter and 18.8% for the past twelve months. The MSCI Emerging Index market equities returned 0.9% in the last three months and 1.8% for the trailing year. Emerging Markets were hindered by tensions between US and China and worries about the Chinese economic recovery.

Fixed Income: The Bloomberg US Aggregate Bond Index returned -0.8% in the first quarter and -0.9% for the past 12 months. The yield on the 10-year treasury bond rose to 3.81% by quarter end versus 3.48% at the end of the first quarter and up substantially from the 3.0% a year ago. The ICE BofA High Yield Index returned 1.6% in the trailing quarter and 8.9% for the past year.

Decelerating Inflation and a Stabilizing Job Market

U.S. Consumer Price Index (CPI)

Year-over-year percent change through June 2023

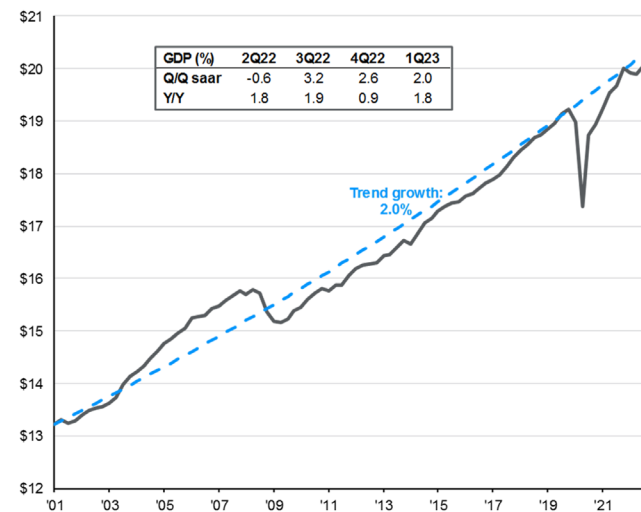

Inflation: Headline CPI increased 0.4% in April, 0.1% in May and 0.2% in June, which is significantly slower than a year ago and continues the decelerating trend over the past seven months. Headline CPI inflation has come down from a peak of 8.9% y/y (year-over-year) in June 2022 to 3% y/y in June 2023. The Core CPI rate, which excludes food and energy, has also come down from 5.9% y/y in June 2022 to 4.8% y/y in June 2023 but was still well over the long term 2% target. Interestingly, the Core CPI rate remained higher than the annual level for headline inflation due to elevated housing prices. As of quarter-end, the largest price increases y/y occurred in automotive and insurance, recreation, and household furnishings sectors.

Labor: Since March of 2022, the unemployment rate has hovered in the mid three percent range, landing on 3.6% for June 2023. This equates to approximately six million unemployed individuals available for work. For the first six months of 2023, the economy has created 1.7 million jobs with 209,000 jobs created in June alone.

Real Gross Domestic Product (GDP)

Trillions of chained (2012) dollars, seasonally adjusted at annual rates

Wages rose by 0.4% in June to approximately 4.4% annually. The ratio of jobs per unemployed person stayed stagnant at 1.7 with little change to the previous quarter and significantly lower than the March 2022 peak of 5.9%. The data suggests that the labor market is healthy and that the Fed policymakers' efforts to combat the wage component of inflation have been successful.

GDP: The first quarter of 2023 registered another quarter of positive GDP growth at 2.0% annually. This followed the 2.6% and 3.2% in the prior two quarters. After the U.S. economy recovered in 2021, growth moderated and even turned negative for part of 2022. During the first half of 2023 the U.S. economy has remained resilient, and much of the data points towards continued improvement.

Plan Legislative and Regulatory Update

Final Rule Regarding Changes to 2023 Form 5500 Issued

On February 23rd, 2023, the Department of Labor (“DOL”), Internal Revenue Service (“IRS”), and the Pension Benefit Guaranty Corporation (“PBGC”) announced modifications to the 2023 Form 5500 and Form 5500-SF.¹ Below are a few of the most significant changes:

- **A change to the participant counting methodology for Defined Contribution (“DC”) plans.** Previously, the methodology used to determine whether a plan qualified as a “large” or “small” plan for filing Form 5500 was based on the total number of employees eligible to participate in the plan, including employees not actively contributing and without an account balance in the plan. Effective January 1, 2023, when calculating the participant count, plan sponsors will now only need to consider participants (active and terminated) with an account balance. As a result, some plans that were previously required to complete an audit will now qualify for the small plan exemption.
- **Consolidated reporting for certain plan types and improved reporting for multiple employer plans (“MEPs”) and pooled employer plans (“PEPs”).**
- **Technical adjustments to align with SECURE 2.0.** These include adjustments for 403(b) MEPS including PEPs, minimum required distributions, and audit requirements for plans in defined contribution group arrangements.
- **Break-out reporting on admin expenses, addition of selected compliance questions, further improvements, and technical adjustments related to annual rollover of forms and instructions.**

Action Item: Plan sponsors should be aware of these changes and review with their Recordkeeper and/or third-party administrators to ensure timely and accurate filing of Form 5500.

Committee Approves Bill Allowing CITs in 403(b)s

On May 24th, 2023, the House Financial Services Committee approved an amended bill that would allow Collective Investment Trusts (“CITs”) in 403(b) plans.² The bill, [Retirement Fairness for Charities and Educational Institutions Act](#) (H.R. 3063), was approved on a bipartisan 35 to 12 vote and sponsored by Rep. Frank Lucas, R-Okla. It will now move to the full House of Representatives for consideration

CITs have long been allowed in 401(k) plans and are growing quickly in use, especially in large retirement plans. While they offer the benefit of lower fees, they are often less transparent as they have no tickers and are not regulated by the Security and Exchange Commission (“SEC”). Previously, the SECURE 2.0 Act had amended the Internal Revenue Code to permit these investments in 403(b) plans, but changes needed to the security law were not ultimately included in the final bill.

Action Item: 403(b) plan sponsors, if you are interested in more information, please contact your NWCM advisor.

IRS Proposes Rule for Retirement Plan Forfeitures

On February 27th, 2023, the IRS proposed a [rule](#) on the use of forfeitures in retirement plans.³ In the proposal, the IRS clarifies that forfeitures can be used for the following:

- Paying plan administrative expenses
- Reducing employer contributions under the plan
- Increasing benefits in other participants’ accounts in accordance with plan terms

The regulation also requires that forfeitures be used no later than 12 months after the close of the plan year in which the forfeitures are incurred. The current guideline requires that forfeitures be used within the same plan year in which they occurred. This new rule is proposed to become effective for plan years beginning on or after January 1, 2024.

Action Item: If the rule is finalized, plan sponsors must ensure their plan includes the required language regarding forfeitures and are following proper forfeiture procedures.⁴

SECURE 2.0 Update

SECURE 2.0 Mandatory Roth Catch-up Contributions

Beginning January 1, 2024, retirement plan participants earning more than \$145,000 will be required to make catch-up contributions as Roth contributions. To continue offering catch-up contributions, plans that currently do not allow Roth contributions will be required to add a provision allowing Roth contributions.¹ Failure to comply with this requirement will result in the elimination of catch-up contributions for all participants, regardless of their wages. This requirement affects 401(k), 403(b), and governmental 457(b) plans.

On June 22, 2023, the American Retirement Association, the American Benefits Council, NAGDCA, and numerous other organizations sent a letter to Congress requesting a two-year delay for the Roth catch-up requirement in SECURE 2.0. They argue that the current 2024 deadline does not provide sufficient time for plans to comply. If the delay is not granted, they propose that the IRS refrain from imposing taxes, penalties, or sanctions for noncompliance with the new rule until January 1, 2026.²

Action Item: Plans that currently do not allow Roth should contact their Recordkeeper to add a Roth provision as soon as possible, in order to continue offering catch-up contributions.

IRS Issues Guidance for SECURE 2.0 Self-Correction Provisions

On May 25th, 2023, the Internal Revenue Service (“IRS”) released additional [guidance](#) on the expanded availability of self-correction made available in the SECURE 2.0 Act.³ SECURE 2.0, which passed in December 2022, sought to expand self-correction availability when plans (or IRAs) fail compliance testing.

This guidance provided clarity on the following items:

- **When self-correction is not available to plan sponsors.** These include significant failures in terminated plans and failure to timely adopt an initial plan document, among several others.
- **The timeframe that self-corrections must be made after a failure is found.** SECURE 2.0 requires that eligible inadvertent failures be corrected within a “reasonable period” after the failure is discovered.
- **The documentation needed for self-correction.** SECURE 2.0 does not provide what documentation is needed; however, the IRS stresses requirements already exist under pre-SECURE 2.0 applicable law.
- **Certain prior restrictions no longer apply.** The IRS confirmed that four previous restrictions, including the completion deadline for significant failure corrections, no longer apply.
- **Several other items.** The IRS provided clarification on various items, including the availability and functioning of expanded self-correction and its application for IRA custodians.

The IRS is accepting comments on the new correction rules until August 23rd, 2023.

Action Item: Plan sponsors should work with their recordkeepers and other service providers to ensure compliance with the implementation of SECURE 2.0.

SECURE 2.0 Implementation Update

SECURE 2.0 introduced several new optional plan design choices, some of which were immediately available upon the bill's passage.

While plan sponsors may be eager to evaluate potential plan design changes, most recordkeepers are still in the process of updating their systems and administrative procedures to accommodate these changes. Additionally, many recordkeepers are awaiting further guidance and accessing plan sponsor interest before making certain optional provisions available on their platforms.

NWCM will continue monitoring your Recordkeeper's operational readiness and will provide additional details as they become available.

NWCM's SECURE 2.0 Guide

We have provided our SECURE 2.0 table on the following pages summarizing the details of several key provisions.

For up-to-date retirement industry news check out our social media pages, which are linked below.

1. Rowland, Claire P. Claire E. Bouffard, Matthew H. Hawes. R. Randall Tracht. "SECURE Act 2.0 Catches Up to Roth". Morgan Lewis, 5 January 2023.

2. Sullivan, John. "ARA, Major Organizations Urge Congress to Delay Roth Catch-Up Requirement". NAPA, 29 June 2023.

3. Daines, Peter. R. Sterling Parkinson. "IRS Issues SECURE 2.0 Guidance on Expanded Availability of Self-Correction". JDSUPRA, 31 May 2023.

KEY PROVISIONS	SECURE 2.0: FINAL BILL	EFFECTIVE DATE	APPLICABLE PLANS & EXCLUSIONS	OPTIONAL OR MANDATORY
SUMMARY	On December 23, 2022, the final version of Secure Act 2.0 was passed by Congress. The bill was signed into law on December 29, 2022.			
ROTH CATCH UP CONTRIBUTIONS	All catch-up contributions must be made as Roth contributions for participants whose wages for the preceding calendar year from the employer sponsoring the plan exceed \$145,000 (indexed).	Tax years beginning after December 31, 2023.	401(k), 403(b), and governmental 457(b) plans. Does not apply to SIMPLE IRAs or SEP plans.	Mandatory except for eligible participants whose prior year wages do not exceed \$145,000 (indexed for inflation).
INCREASED CATCH UP LIMITS	Expands the catch-up limit to \$10,000 for individuals age 60, 61, 62 and 63.	Tax years beginning after December 31, 2024.	401(k), 403(b), and governmental 457(b) but can't be used in addition to 457(b) special catch-up.	Optional provision.
REQUIRED MINIMUM DISTRIBUTIONS	Raises the RMD age to 73 starting in 2023 and 75 in 2033. Excise taxes for RMD failures will decrease from 50% to 25%, and to 10% if corrected promptly. Removes the RMD barriers for life annuities.	Distributions made after December 31, 2022, for individuals who attain age 72 after that date.	401(a), 401(k), 403(b), 457(b) plans, and traditional IRAs.	Mandatory provision.
STUDENT LOANS	Allows employers to treat student loan payments as elective deferrals for purposes of matching contributions.	Plan years after December 31, 2023.	401(k), 403(b), governmental 457(b) plans, and SIMPLE IRAs.	Optional provision.
MATCHING ROTH CONTRIBUTIONS	Allows plans to permit employees to elect that matching contributions be treated as Roth contributions.	Contributions made after the date of enactment (December 31, 2022).	401(k), 403(b), and governmental 457(b) plans.	Optional provision.
SMALLER EMPLOYER STARTUP CREDIT	Enhances the credit for small employer retirement plan startup costs.	Tax years beginning after December 31, 2022.	Employers with up to 50 employees (phased out for employers with between 51 and 100 employees).	N/A
SAVER'S CREDIT	Enhances the Saver's Credit by simplifying the credit rate.	Tax years beginning after December 31, 2026.	Participants below the AGI threshold are eligible. Those under the age of 18, full-time students, nonresident aliens, or anyone who can be claimed as a dependent are ineligible.	N/A
RETIREMENT LOST & FOUND	Requires that the Treasury department establish a retirement savings "lost and found" database, managed by the Department of Labor, to help participants find lost benefits.	Must be created no later than two years after the date of enactment (December 31, 2022).	Applies to tax-qualified defined benefit and defined contribution plans subject to ERISA.	N/A
LONG-TERM PART-TIME WORKERS	Reduces the service requirement for part-time workers from three years to two (two consecutive 12-month periods during each of which the employee has at least 500 hours of service).	Generally effective for plan years after December 31, 2024.	ERISA 401(k) and ERISA 403(b) plans. Does not apply to employees subject to collective bargaining or nonresident aliens. The 12-month period beginning before January 1, 2023, is not taken into account.	Mandatory provision.
MANDATORY AUTO-ENROLLMENT	Requires mandatory auto-enrollment for new plans, with a default rate between 3% and 10%, increasing 1% each year to at least 10%, but not more than 15%.	Plan years after December 31, 2024	New 401(k) and 403(b) plans. Existing plans, new businesses (less than 3 years old), small businesses (less than 10 employees), and government plans are exempt.	Mandatory provision.
SMALL SUM DISTRIBUTIONS	Raises the limit on mandatory cash-out distributions for terminated participants from \$5,000 to \$7,000.	Distributions after December 31, 2023.	401(a), 401(k), 403(b), and governmental 457(b) plans.	Optional provision.
EMERGENCY SAVINGS	Allows for the creation of pension-linked emergency savings accounts up to \$2,500.	Plan years after December 31, 2023.	401(k), 403(b), and governmental 457(b) plans.	Optional provision.
EMERGENCY WITHDRAWALS	Allows workers to withdraw up to \$1,000 from their retirement account, every three years, to cover emergency expenses (plans may rely on employee's written self-certification), with the option to repay the distribution within 3 years.	Distributions after December 31, 2023.	401(a), 401(k), 403(b), governmental 457(b) plans and traditional IRAs.	Optional provision.

KEY PROVISIONS (CONTINUED)	SECURE 2.0: FINAL BILL	EFFECTIVE DATE	APPLICABLE PLANS & EXCLUSIONS	OPTIONAL OR MANDATORY
DOMESTIC ABUSE	Victims of domestic abuse would not face the 10% penalty for withdrawing up to \$10,000 from their retirement savings (or 50% of the account balance, whichever is less).	Distributions after December 31, 2023.	401(k) and 403(b) plans (hardship withdrawals); governmental 457(b) plans (unforeseeable emergency withdrawals)	N/A
"FIRST DAY OF THE MONTH" REQUIREMENT	Eliminates the "first day of the month" requirement for governmental section 457(b) plans, allowing 457(b) elections to be made any time prior to the compensation being deferred is available.	Tax years beginning after the date of enactment (December 31, 2022).	Governmental Section 457(b) plans.	Mandatory provision.
DE MINIMIS INCENTIVES	Allows for small immediate financial incentives for contributing to a plan (e.g., gift cards). The incentives may not be paid for from plan assets.	Plan years beginning after the date of enactment (December 31, 2022).	401(k) and 403(b) plans.	Optional provision.
SELF-CERTIFICATION RULES	Allows plan sponsors to rely on an employee's self-certification for hardship distributions.	Plan years beginning after the date of enactment (December 31, 2022).	401(k) and 403(b) plans (hardship withdrawals); governmental 457(b) plans (unforeseeable emergency withdrawals).	Optional provision.
REPAYMENT OF QBADS	Allows repayment of QBAD (qualified birth and adoption) distributions over a 3-year period. For prior distributions, the repayment period ends December 31, 2025.	Plan years beginning after 2019.	401(a), 401(k), 403(b), and governmental 457(b) plans and traditional IRAs.	Optional provision.
EASING DISCLOSURE REQUIREMENTS FOR UNENROLLED PARTICIPANTS	Eligible participants who are not contributing and do not have a balance are no longer required to be provided most participant disclosures as long as they have received an SPD and an annual reminder notice of their eligibility.	Plan years beginning after December 31, 2022.	401(a), 401(k), 403(b), and governmental 457(b) plans.	N/A
STARTER 401(K)S	Creates a "starter 401(k) deferral-only arrangement" and a "safe harbor 403(b) plan" which aims to make it easier for small business to offer retirement plans. Under this provision, small businesses are provided a safe harbor for offering retirement plans. Annual contributions for these starter plans would be limited to \$6,000.	Plan years beginning after December 31, 2022.	401(k) and 403(b) plans.	N/A
DISASTER RELIEF	Provides permanent rules allowing for the use of up to \$22,000 to be distributed from employer retirement plans in the case of disaster.	Disasters occurring on or after January 26, 2021.	401(a), 401(k), 403(b), or governmental 457(b) plan or a traditional IRA.	Mandatory provision.
DISTRIBUTIONS TO TERMINALLY ILL PARTICIPANTS	The 10% additional tax for early distributions will not apply to distributions to a terminally ill individual.	Distributions after December 31, 2023.	401(k) and 403(b) plans (hardship withdrawals); governmental 457(b) plans (unforeseeable emergency withdrawals)	N/A
AUTOMATIC PORTABILITY OF ROLLOVERS	Allows for the automatic rollover of a participant's IRA to a new employer plan unless the participant affirmatively elects otherwise.	Transactions occurring one year after the date of enactment (December 31, 2022).	401(a), 401(k), 403(b), and governmental 457(b) plans, SEPs, and SIMPLE plans all with less than 100 employees.	Optional provision.
403(B) MULTIPLE EMPLOYER PLANS	Allows for the creation of multiple employer 403(b) plan arrangements.	Plan years beginning after December 31, 2022.	403(b) plans.	Optional provision.
403(B) COLLECTIVE INVESTMENT TRUSTS	Allows 403(b) plan participation in Collective Investment Trusts (CITs). However, the necessary corresponding security law changes have not yet been made.	Amounts invested after date of enactment (December 31, 2023). Security law issues will need to be addressed before CITs are a viable option for 403(b) plans.	403(b) plans.	Optional provision.

Please refer to the Disclosure section for additional details regarding performance calculation methodology and other disclosures.

Performance information is calculated based on monthly performance values as provided by Morningstar or directly from the investment provider.

Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert.

Maintain: A total score ranging from 45 - 100 points indicates that the fund has met the investment monitoring criteria

Watch: A total score less than 45 points indicates that the fund has not met the investment monitoring criteria and has been placed on the Watch List.

Investments on the watch list continue to be monitored according to investment methodology to determine the current and future level of suitability and its purpose in the context of the overall portfolio. The plan will be notified of any potential recommendations or actions that should be considered regarding the status of the funds on the watch list.

Replace: It is suggested that some action be taken because the fund has been on the watch list for 99 quarters or more.

Please review additional disclosures on Investment monitoring section and disclosures at end of the report.

Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert. Pass, watch, review statuses are based on thresholds defined, administered and reviewed by the advisor or advisor's home office. Each individual fund will be scored based upon monitoring criteria and respective thresholds. The amount of points that a fund earns for passing the threshold for a given criterion depends on the weighting of that criterion in the overall scoring methodology. The points earned for each criterion are totaled to determine whether a fund is classified as "Pass", "Watch" or "Review". Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert. Investments on the watch list continue to be monitored according to investment methodology to determine the current and future level of suitability and its purpose in the context of the overall portfolio. The plan will be notified of any potential recommendations or actions that should be considered regarding the status of the funds on the watch list. Please review additional disclosures on Investment monitoring criteria definitions and other disclosures at end of the report. Indices cannot be invested in directly. Unmanaged index returns assume reinvestment of any and all distributions. Please see disclosures for benchmark definitions, blended benchmark calculation methodology and other disclosures.

Monitoring Methodology

Index Funds Criteria	Threshold	Weightings
Excess Return 1Yr	In top 75% of peer group	This criteria carries a weighting of 6.66%
Excess Return 3Yr	In top 75% of peer group	This criteria carries a weighting of 6.67%
Excess Return 5Yr	In top 75% of peer group	This criteria carries a weighting of 6.67%
Tracking Error 1Yr	In bottom 75% of peer group	This criteria carries a weighting of 13.33%
Tracking Error 3Yr	In bottom 75% of peer group	This criteria carries a weighting of 13.33%
Tracking Error 5Yr	In bottom 75% of peer group	This criteria carries a weighting of 13.34%
Batting Average 3Yr	In top 75% of peer group	This criteria carries a weighting of 1.66%
Batting Average 5Yr	In top 75% of peer group	This criteria carries a weighting of 1.67%
Batting Average 10Yr	In top 75% of peer group	This criteria carries a weighting of 1.67%

R-Sqrd 5Yr	In top 75% of peer group	This criteria carries a weighting of 6.67%
R-Sqrd 10Yr	In top 75% of peer group	This criteria carries a weighting of 6.67%
Average Manager Tenure	At least a 3 year track record	This criteria carries a weighting of 5.0%
Expense Ratio	In bottom 75% of peer group	This criteria carries a weighting of 10.0%

Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert.

Pass, watch, review statuses are based on thresholds defined, administered and reviewed by the advisor or advisor's home office. Each individual fund will be scored based upon monitoring criteria and respective thresholds. The amount of points that a fund earns for passing the threshold for a given criterion depends on the weighting of that criterion in the overall scoring methodology. The points earned for each criterion are totaled to determine whether a fund is classified as "Pass", "Watch" or "Review". Please note that the monitoring methodology is not intended to be investment advice, and is only intended to provide a historical performance alert. Investments on the watch list continue to be monitored according to investment methodology to determine the current and future level of suitability and its purpose in the context of the overall portfolio. The plan will be notified of any potential recommendations or actions that should be considered regarding the status of the funds on the watch list. Please review additional disclosures on Investment monitoring criteria definitions and other disclosures at end of the report. Indices cannot be invested in directly. Unmanaged index returns assume reinvestment of any and all distributions. Please see disclosures for benchmark definitions, blended benchmark calculation methodology and other disclosures.

Comments:

Alger Spectra returned 13.7% for the trailing quarter compared to 12.5% for its benchmark (the Russell 3000 Growth). For the trailing year, the fund returned 23.0% compared to the benchmark's 26.6%. The largest impacts on the fund's positive relative return this quarter were the under-allocation to consumer staples, and security choices within technology and health care. Leading contributors were household names like NVIDIA, Microsoft, and Amazon. On the other hand, MercadoLibre and Natera were the leading detractors. Looking forward, the fund's managers continue to observe themes which they believe create attractive investment opportunities, such as corporations digitizing their operations, cloud computing, and artificial intelligence. The fund's performance is being closely monitored by our investment committee. Though the fund beat the benchmark this quarter, it has struggled since 2020 and continues to remain on Watch, scoring 8 out of 100 under our scoring methodology. As of the committee meeting held on June 15th, 2023, the County has decided to remove this fund from the lineup.

Comments:

The Alger Small Cap Focus fund returned 1.4% in Q2 2023, compared to 7.1% for its benchmark (the Russell 2000 Growth TR USD). For the trailing year, the fund returned 5.7% compared to 18.5% for the benchmark. The fund's relative underperformance this quarter was attributable to poor stock selection in the technology and industrials sectors, while an underweight position in consumer discretionary aided performance. The benefit from the fund's overweight position in health care was offset by poor stock selection within the sector. Notable underperformers in the health care sector included Natera Inc and Repligen Corp. Mercury Systems Inc, an aerospace and defense technology company, was the leading detractor this quarter. Mercury saw a significant drop in its share price after the company announced it was appointing an interim president and CEO following an unsuccessful search for a buyer. In terms of sector allocation, health care remains the fund's largest overweight. Looking forward, management continues to prioritize businesses with robust cash flow generation and solid balance sheets, emphasizing low debt levels as a key criteria for potential investments. Management is particularly interested in science-based companies, a reflection of the fund's overweight in health care. The fund scores a 10 under our scoring methodology and remains on watch. As of the committee meeting held on June 15th, 2023, the County has decided to remove this fund from the lineup.

Comments:

Invesco Developing Markets returned -0.2% in Q2 2023 compared to 0.9% for its benchmark (the MSCI Emerging Markets Index). For the last 12 months, the fund returned 11.7% compared to 1.7% for the benchmark. Indian, South Korean, and Taiwanese investments were major negatives this quarter, with performance also being hurt by an overweight allocation in consumer discretionary. By individual stock, overweight positions in H World Group and Yum China Holdings, both Chinese consumer discretionary stocks, subtracted from relative performance, though overall the fund was underweight China. In general, Chinese equities were negatively impacted by investor concern over escalating political tensions between the United States and China. On a positive note, the fund's financial equity selection was a major boon for relative performance. For example, the leading contributor was Nu Holdings Ltd, a financial company which earns most of its revenue by providing digital banking services in Brazil. Management, led by Justin Leverenz, believes that the current market environment favors those with an idiosyncratic approach and rewards genuine imagination and creativity in unearthing the rare breed of extraordinary companies. This quarter the fund's score fell to 33 (from 63) under NWCM's methodology and continues to be on Watch due to long-term underperformance. We will continue to monitor the fund closely.

Comments:

Metropolitan West Total Return Bond returned -1.3% for the trailing quarter compared to -0.8% for its benchmark (the BBgBarc US Agg Bond Index). For the trailing year, the fund returned -1.4% compared to -0.9% for the benchmark. The fund's longer duration versus the benchmark was again the primary headwind for performance (7.13 yrs versus 6.31 yrs). An overweight to high yield credit and securitized products also detracted from performance. An overweight to residential mortgage backed securities (MBS) boosted relative returns as both agency and non-agency MBS benefitted from reduced volatility in the second quarter, and from increased demand. Incremental additions in the agency space during bouts of technical weakness resulted in a bit of a drag on performance, along with the underweight to Ginnie Mae issues. Agency MBS represents a sizable overweight given the government-guaranteed nature, strong liquidity, and historically attractive spreads. Exposure to CMBS has been trimmed in recent months, with current holdings focused on higher quality issues and selected single-asset, single-borrower structures and underlying properties that the team believes are likely to weather a looming correction facing the sector. Finally, asset backed securities (ABS) exposure currently focuses on collateralized loan obligations (CLOs) and a variety of smaller collateral types (solar, single-family rentals, auto residuals, etc.). The fund scores 23 under NWCM's scoring methodology.

Fund Fact Sheets

Alger Spectra Y | ASPYX

Large Growth | Status: Watch

Investment Objective

The investment seeks long-term capital appreciation. The fund invests primarily in the equity securities of companies of any size that the manager believes demonstrate promising growth potential. Equity securities include common or preferred stocks that are listed on U.S. or foreign exchanges. It may invest a significant portion of its assets in securities of companies conducting business within a single sector, including the information technology, consumer discretionary, and healthcare sectors.

Equity Index Fund M

Large Blend | Status: Maintain

Investment Objective

The Equity Index Fund (the "Fund") is an index fund that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of a particular index. The Fund shall be invested and reinvested in a portfolio of equity securities with the objective of approximating as closely as practicable the capitalization weighted total rate of return of that segment of the U.S. market for publicly traded equity securities represented by the larger capitalized companies. The criterion for selection of investments shall be the Benchmark listed herein.

Columbia Dividend Income Inst3 | CDDYX

Large Value | Status: **Maintain**

Investment Objective

The investment seeks total return, consisting of current income and capital appreciation. The fund invests at least 80% of its net assets (including the amount of any borrowings for investment purposes) in a diversified portfolio of income-producing (dividend-paying) equity securities, which will consist primarily of common stocks but also may include preferred stocks and convertible securities. It invests principally in securities of companies believed to be undervalued but also may invest in securities of companies believed to have the potential for long-term growth. The fund may invest in companies that have market capitalizations of any size.

T. Rowe Price Mid-Cap Growth I | RPTIX

Mid-Cap Growth | Status: Maintain

Investment Objective

The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its net assets (including any borrowings for investment purposes) in a diversified portfolio of common stocks of mid-cap companies whose earnings T. Rowe Price expects to grow at a faster rate than the average company. The advisor defines mid-cap companies as those whose market capitalization falls within the range of either the S&P MidCap 400® Index or the Russell Midcap® Growth Index.

BlackRock Mid Cap Equity Index Fund M

Mid-Cap Blend | Status: Maintain

Investment Objective

'The Mid Capitalization Equity Index Fund M (the "Fund") is an index fund that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of a particular index. The Fund shall be invested and reinvested in a portfolio of equity securities with the objective of approximating as closely as practicable the capitalization weighted total rate of return of that segment of the U.S. market for publicly traded equity securities represented by the medium capitalized companies. The criterion for selection of investments shall be the Benchmark listed herein.'

Alger Small Cap Focus Y | AOFYX

Small Growth | Status: Watch

Investment Objective

The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies that, at the time of purchase of the securities, have total market capitalization between (1) the higher of (a) \$5 billion or (b) the company in either the Russell 2000 Growth Index or the MSCI USA Small Cap Index with the highest capitalization, and (2) the company in either index with the lowest capitalization, at any time during the most recent 12-month period as reported by either index. Both indexes are broad-based indexes of small capitalization stocks.

Columbia Small Cap Value II Inst3 | CRRYX

Small Value | Status: Maintain

Investment Objective

The investment seeks long-term capital appreciation. Under normal circumstances, the fund invests at least 80% of its net assets (including the amount of any borrowings for investment purposes) in equity securities of companies that have market capitalizations in the range of the companies in the Russell 2000® Value Index at the time of purchase that the fund's investment manager believes are undervalued and have the potential for long-term growth. It may invest up to 20% of its total assets in foreign securities, including depositary receipts. The fund normally invests in common stocks and also may invest in real estate investment trusts.

Franklin Utilities R6 | FUFRX

Utilities | Status: Maintain

Investment Objective

The investment seeks capital appreciation and current income. The fund normally invests at least 80% of its net assets in the securities of public utilities companies. These are companies that provide electricity, natural gas, water, and communications services to the public and companies that provide services to public utilities companies. It concentrates (invests more than 25% of its total assets) in companies operating in the utilities industry. The fund invests primarily in equity securities, which consist mainly of common stocks.

EAFE Equity Index Fund F

Foreign Large Blend | Status: **Maintain**

Investment Objective

The BlackRock MSCI EAFE Equity Index Fund (the "Fund") is an index fund that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of a particular index. The Fund shall be invested in a portfolio of international equity securities whose total rates of return will approximate as closely as practicable the capitalization weighted total rates of return of the markets in certain countries for equity securities traded outside the United States. The primary criterion for selection of investments in the Fund shall be the Benchmark listed herein.

T. Rowe Price Overseas Stock I | TROIX

Foreign Large Blend | Status: **Maintain**

Investment Objective

The investment seeks long-term growth of capital through investments in the common stocks of non-U.S. companies. The manager expects to invest significantly outside the U.S. and to diversify broadly among developed market and, to a lesser extent, emerging market countries throughout the world. It normally invests at least 80% of its net assets (including any borrowings for investment purposes) in non-U.S. stocks and at least 65% of its net assets in stocks of large-cap companies.

Vanguard Developed Markets Index Admiral |VTMGX

Foreign Large Blend | Status: **Maintain**

Investment Objective

The investment seeks to track the performance of the FTSE Developed All Cap ex US Index. The fund employs an indexing investment approach designed to track the performance of the FTSE Developed All Cap ex US Index, a market-capitalization-weighted index that is made up of approximately 4,006 common stocks of large-, mid-, and small-cap companies located in Canada and the major markets of Europe and the Pacific region. The Advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Investment Objective

The investment seeks higher than average income, and capital growth is the secondary objective. The fund normally invests primarily in preferred and common stocks of REITs, debt securities of real estate entities, and commercial and other mortgage-backed securities, with an emphasis on lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds). It invests at least 80% of assets in securities of companies principally engaged in the real estate industry and other real estate related investments. The fund invests in domestic and foreign issuers.

BlackRock U.S. Debt Index W

Intermediate Core Bond | Status: **Maintain**

Investment Objective

The Fund is an 'index fund' that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of its Underlying Index (defined below). The Fund shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the total rate of return of the market for debt securities as defined by the Bloomberg Barclays U.S. Aggregate Bond Index (the 'Underlying Index'). BlackRock Institutional Trust Company, N.A. ('BTC') uses a 'passive' or indexing approach to try to achieve the Fund's investment objective. Unlike many funds, the Fund does not try to outperform the index it seeks to track and does not seek temporary defensive portions when markets decline or appear overvalued. BTC uses a representative sampling indexing strategy to manage the Fund.

Metropolitan West Total Return Bd Plan | MWTSX

Intermediate Core-Plus Bond | Status: Watch

Investment Objective

The investment seeks to maximize long-term total return. The fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets in investment grade fixed income securities or unrated securities determined by the Adviser to be of comparable quality. Up to 20% of the fund's net assets may be invested in securities rated below investment grade or unrated securities determined by the Adviser to be of comparable quality. The fund also invests at least 80% of its net assets, plus any borrowings for investment purposes in fixed income securities it regards as bonds.

Vanguard Total Intl Bd Idx Admiral™ | VTABX

Global Bond-USD Hedged | Status: Maintain

Investment Objective

The investment seeks to track the performance of a benchmark index that measures the investment return of non-U.S. dollar-denominated investment-grade bonds. The fund employs an indexing investment approach designed to track the performance of the Bloomberg Global Aggregate ex-USD Float Adjusted RIC Capped Index (USD Hedged). This index provides a broad-based measure of the global, investment-grade, fixed-rate debt markets. It is non-diversified.

Empower Lifetime 2040 Trust

Target-Date 2040 | Status: **Maintain**

Investment Objective

The investment objective of each Fund is to seek capital appreciation and income. After the target year noted in the name of the Fund, the investment objective is to seek income and secondarily, capital growth. The Lifetime Conservative Trust series are generally expected to pursue a more conservative allocation strategy relative to the Lifetime Trust series, whereas the Lifetime Trust series are generally expected to pursue a more aggressive allocation strategy for a particular target date.

Glossary and Disclosures

Glossary

Return: the money made or lost on an investment over some period of time. A return can be expressed nominally as the change in dollar value of an investment over time.

Standard Deviation (Std. Dev.): measures the dispersion of a dataset relative to its mean. It is calculated as the square root of the variance. Standard deviation is used as a measure of a relative riskiness of an asset.

Sharpe Ratio (Sharpe): is used to help investors understand the return of an investment compared to its risk. The ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

Average Manager Tenure: the length of time that an investment manager has been at the helm of an investment fund.

Expense Ratio: measures how much of a fund's assets are used for administrative and other operating expenses. An expense ratio is determined by dividing a fund's operating expenses by the average dollar value of its assets under management (AUM).

Up Capture: the statistical measure of an investment manager's overall performance in up-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen.

Down Capture: the statistical measure of an investment manager's overall performance in down-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has dropped.

Excess Return: returns achieved above and beyond the return of a proxy. Excess returns will depend on a designated investment return comparison for analysis. The riskless rate and benchmarks with similar levels of risk to the investment being analyzed are commonly used in calculating excess return.

Tracking Error: the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark. This is often in the context of a hedge fund, mutual fund, or exchange-traded fund (ETF) that did not work as effectively as intended, creating an unexpected profit or loss.

Batting Average: a statistical technique used to measure an investment manager's ability to meet or beat an index. The higher the batting average, the better. The highest number possible average would be 100% while the lowest is 0%.

R-Squared (R-Sqrd): measures how closely the performance of an asset can be attributed to the performance of a selected benchmark index. R-squared is measured on a scale between 0 and 100; the higher the R-squared number, the more correlated the asset is to its benchmark.

Disclosures

Important Disclosure Information

This report is for informational purposes only, and attempts to provide only broad guidelines and information that can be used to help you shape your employee retirement benefit plan. The information will not assess the suitability or give assurance about the potential value of any particular investment. Certain securities may not be suitable for all investors.

All data included in this report, including, but not limited to charts/graphs, plan level data and investment data is dependent upon the quality and accuracy of information supplied by the plan, service providers, investment firms, reporting companies and other sources. While the information is believed to be true and accurate, no guarantee is made to its completeness or accuracy. Plan Sponsors compare the account statements received from their record keeper or Custodian with any statements received from ERS and/or the advisor associated with their plan (if applicable). Please contact ERS and/or your Advisor if you believe there are any material discrepancies between your custodial statement and any other statements received.

©2023 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

Risk-return calculations done by Envestnet Retirement Solutions (ERS) technology based on monthly returns received from Morningstar and/or investment provider.

Investors should consider the investment objectives, risks, charges and expenses before investing. The prospectuses (for Investment Company Securities) and disclosure documents (for Collective Investment Trust options) contain this and other important information. These documents are available through you plan's Record Keeper. Read carefully before investing.

Past performance is no guarantee of future results. Performance data quoted represents past performance. Investment return and principal will fluctuate so that an investor's shares or units, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information quoted.

For additional information made publicly available by the fund's sponsor, including performance data to the most recent month-end, please visit the fund's Website. Performance quoted is at net asset value (NAV), reflects the reinvestment of dividends and capital gains, and is net of expenses. Returns do not include the effects of maximum sales charge, if any, as sales charges are waived for qualified plans. If the effects of sales charges were included, returns would be lower. In certain circumstances, a back-end sales charge or redemption fee may be assessed upon redemption of shares within a particular timeframe. Please refer to the prospectus, disclosure document (for Collective Investment Trust options) and/or statement of additional information for specific details. *An investment in the money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.*

For certain investment options, the returns shown reflect fee subsidies and waivers, without which the results would have been lower than noted. These fee subsidies and waivers may not continue to remain in effect in the future. Please note that certain funds will charge a redemption fee for short-term trading. The returns shown do not reflect short-term trading fees, which if included would reduce returns. Investments in target date funds are subject to the risks of their underlying funds. The year in a target date fund name refers to the approximate year (the target date) when an investor in the fund would retire and leave the workforce. Target date funds will gradually shift their emphasis from more aggressive investments to more conservative ones based on the indicated target date.

Disclosures

An investment in a target date fund is not guaranteed at any time, including on or after the target date. Target date fund suggestions are based on an estimated retirement age of approximately 65. Should the investor choose to retire significantly earlier or later, he/she may want to consider a fund with an asset allocation more appropriate to his/her situation. The stable value funds identified, if any, are structured either as collective investment trust funds ("CITs") or insurance company general or separate accounts, but are not mutual funds (as defined under the Investment Company Act of 1940, as amended). For detailed information about these products please see the applicable disclosure document related to the product in question. Investments identified as Separately Managed Accounts ("SMA"), if any, are not registered mutual funds. SMAs are privately managed investment accounts that have various investment objectives, differing degrees of risk, and utilize varying investment strategies. Detailed information on each SMA available to your Plan is available directly from the Registered Investment Advisor with whom the Plan Sponsor has contracted to manage the SMA.

Asset allocation and market value are subject to change. Indices are unmanaged and are unavailable for direct investment.

The technology solution for the proposal is developed by Envestnet Retirement Solutions, LLC ("ERS"). ERS is also a registered investment advisor with the U.S. Securities Exchange Commission. However, any advisory solutions are provided under a separate legal contract. Unless otherwise indicated, ERS is not affiliated with the investment advisory firm listed in this report. ERS is a wholly owned subsidiary of Envestnet, Inc.

Unless otherwise indicated, ERS is not affiliated with the entities listed in this report. Envestnet Retirement Solutions, LLC is a majority owned subsidiary of Envestnet, Inc., and Envestnet Asset Management, Inc., d/b/a Envestnet | PMC is a wholly owned subsidiary of Envestnet, Inc.

Blended Benchmark Calculation Methodology

The Blended Benchmark Performance is calculated based on the historical performance of the benchmark assigned to each underlying investment in the Plan, weighted based on the asset allocation as of the report date. Returns are hypothetical and do not reflect actual benchmark returns of the plan as asset allocations of the underlying investments and the benchmarks assigned to each may have changed throughout the history of the periods reported. In the event that a benchmark does not have performance for any period, that benchmark is not used in the calculation and the total assets to calculate the weighted average are reduced accordingly.

Plan Category Calculation Methodology

The Plan Category Return is calculated based on the historical performance of the investment category (Peer Group) assigned to each underlying investment that is assigned to the category, weighted based on the asset allocation as of the report date. Returns are hypothetical and do not reflect actual category returns of the plan as asset allocations of the underlying investments and the categories assigned to each may have changed throughout the history of the periods reported.

Disclosures

Capital Markets Commentary Disclosure

Certain sections of this commentary contain forward-looking statements that are based on our reasonable expectations, estimates, projections, and assumptions. Forward-looking statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Past performance is not indicative of future results. All indices are unmanaged and investors cannot invest directly into an index. The Dow Jones Industrial Average is a price-weighted average of 30 actively traded blue-chip stocks. The S & P 500 Index is a broad-based measurement of changes in stock market conditions based on the average performance of 500 widely held common stocks. The MSCI EAFE Index is a float-adjusted market capitalization index designed to measure developed market equity performance, excluding the U.S. and Canada. The MSCI Emerging Markets Free Index is a market capitalization-weighted index composed of companies representative of the market structure of 26 emerging market countries in Europe, Latin America, and the Pacific Basin. It excludes closed markets and those shares in otherwise free markets that are not purchasable by foreigners. The Barclays Capital Aggregate Bond Index is an unmanaged market value-weighted index representing securities that are SEC-registered, taxable, and dollar-denominated. It covers the U.S. investment-grade fixed-rate bond market, with index components for a combination of the Barclays Capital government and corporate securities, mortgage-backed pass-through securities, and asset-backed securities. The Barclays Capital U.S. Corporate High Yield Index covers the USD-denominated, non-investment-grade, fixed-rate, taxable corporate bond market. Securities are classified as high-yield if the middle rating of Moody's, Fitch, and S & P is Ba1/BB+/BB+ or below.

Risks

Investing in mutual funds, which are generally intended as long-term investments, involves risk, including the possible loss of principal. It is important to understand that certain types of securities and/or investment strategies employed by mutual funds may expose an investor to additional inherent risks. Investments in foreign securities are subject to special additional risks, including currency risk, political risk, and risk associated with varying accounting standards. Funds invested in emerging markets may accentuate these risks. Sector funds (those funds that invest exclusively in one sector or industry), such as technology or real estate stocks, are subject to substantial volatility due to adverse political, economic, or other developments and may carry additional risk resulting from lack of industry diversification. Non-diversified funds, which invest more of their assets in a single issuer, may experience substantial volatility due to the increased concentration of investments. Funds that invest in small or mid-capitalization companies may experience a greater degree of market volatility, and potential for business failure, than those of large-capitalization stocks and are riskier investments. Bond funds have the same interest rate, inflation, and credit risks as associated with the underlying bonds owned by the fund. Generally, the value of bond funds rises when prevailing interest rates fall and falls when interest rates rise. Funds that invest in lower-rated debt securities, commonly referred to as high yield or junk bonds, have additional risks and may be subject to greater market fluctuations and risk of loss of income and principal (relative to higher-rated securities), due to the lower credit quality of the securities and increased risk of default. Bear in mind that higher return potential is accompanied by higher risk. Although diversification is not a guarantee against loss, it can be an effective strategy to help manage risk. There is no guarantee that a diversified portfolio will outperform a nondiversified portfolio. Diversification does not assure a profit or protect against loss in a declining market. There are no assurances that your investment objectives will be achieved. When viewing performance of an index, keep in mind that indices are unmanaged and are not subject to charges and expenses that may otherwise be applicable to investment options available in your plan. These indices are unavailable for direct investment. Past performance is no guarantee of future results.

Disclosures

Monitoring Report - Executive Summary and Status History - Executive Summary Methodology

The Investment Policy Statement Score is a ranking, from 0 - 100, of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Score is calculated on a quarterly basis for open-end mutual funds, exchange-traded funds, and Separate Accounts. The Score is calculated by first combining open-end mutual fund and ETF databases (data source: Morningstar). Each investment is then evaluated against the individual criterion (factors and thresholds) and point system identified in the Criteria section of this document. Next, the points are totaled and the total for each investment is assigned a passing or failing rating. Investments with fewer than 60 points are automatically given a failing score. A score of 100 is most favorable, and a score of 0 is least favorable. The Score relies upon peer group comparison. Determining an investment's appropriate peer group or asset class is subjective. There are no industry standards for determining a money manager's investment style or peer group, which makes it difficult to track some investments across different databases. Morningstar data is utilized in the calculation of the Score and therefore uses the Morningstar Category as the investment's peer group. To make the peer group analysis meaningful, the data set should be substantial enough to draw comparisons. With that in mind, we require at least a three-year history in order to calculate a Score for the investments in a peer group. Investments within peer groups that do not meet the requirement will not receive a Score. When evaluating Separate Accounts, the combined mutual fund / ETF peer group data is used as the backdrop to rank the Separate Accounts. The Separate Account database is limited in size, and since these products are used interchangeably in the marketplace with mutual funds, the combined mutual fund / ETF peer groups provide a better analysis of the Separate Accounts' data.

Investment Policy Criteria

The Monitoring Report displays fund and benchmark data based on the Investment Policy Criteria selected by the Plan Sponsor. The specific criteria appear in the header and the IPS Rating indicates the number of criteria that have been met in accordance with the Investment Policy Statement.

Morningstar Rating Overall Methodology: Funds are ranked within their categories according to their risk-adjusted return (after accounting for all sales charges and expenses), and stars are assigned such that the distribution reflects a classic bell-shaped curve with the largest section in the center. The 10% of funds in each category with the highest risk-adjusted return receive five stars, the next 22.5% receive four stars, the middle 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. Funds are rated for up to three periods—the trailing three, five, and 10 years and ratings are recalculated each month. Funds with less than three years of performance history are not rated. For funds with only three years of performance history, their three-year star ratings will be the same as their overall star ratings. For funds with five-year records, their overall rating will be calculated based on a 60% weighting for the five-year rating and 40% for the three-year rating. For funds with more than a decade of performance, the overall rating will be weighted as 50% for the 10-year rating, 30% for the five-year rating, and 20% for the three-year rating. The star ratings are recalculated monthly. For multiple-share-class funds, each share class is rated separately and counted as a fraction of a fund within this scale, which may cause slight variations in the distribution percentages. This accounting prevents a single portfolio in a smaller category from dominating any portion of the rating scale. If a fund changes Morningstar Categories, its historical performance for the longer time periods is given less weight, based on the magnitude of the change. (For example, a change from a small-cap category to large-cap category is considered more significant than a change from mid-cap to large-cap) Doing so ensures the fairest comparisons and minimizes any incentive for fund companies to change a fund's style in an attempt to receive a better rating by shifting to another Morningstar Category.

Benchmark Definitions

Russell 3000 Growth TR USD

The index measures the performance of the broad growth segment of the US equity universe. It includes Russell 3000 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 1000 TR USD

The index measures the performance of the large-cap segment of the US equity securities. It is a subset of the Russell 3000 index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership.

Russell Mid Cap Growth TR USD

The index measures the performance of the mid-cap growth segment of the US equity universe. It includes Russell midcap index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

S&P MidCap 400 TR

The index measures the performance of mid-sized US companies, reflecting the distinctive risk and return characteristics of this market segment. It comprises stocks in the middle capitalization range, covering approximately 7% of the of US equity market.

Russell 2000 Growth TR USD

The index measures the performance of small-cap growth segment of the US equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

Russell 2000 TR USD

The index measures the performance of the small-cap segment of the US equity universe. It is a subset of the Russell 3000 and includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

Russell 2000 Value TR USD

The index measures the performance of small-cap value segment of the US equity universe. It includes those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

S&P 500 Sec/Utilities TR USD

The index measures the performance of all those companies held in the S&P 500 index that are classified as a utilities(sector) company using the Global Industry Classification Standard(GICS) system.

Benchmark Definitions

MSCI ACWI Ex USA NR USD

The index measures the performance of the large and mid cap segments of the particular regions, excluding USA equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI EAFE NR USD

The index measures the performance of the large and mid cap segments of developed markets, excluding the US & Canada equity securities. It is free float-adjusted market-capitalization weighted.

MSCI EM NR USD

The index measures the performance of the large and mid cap segments of emerging market equity securities. It is free float-adjusted market-capitalization weighted.

S&P United States REIT TR USD

The index measures the performance of investable universe of publicly traded real estate investment trusts domiciled in the United States.

Bloomberg US Agg Bond TR USD

The index measures the performance of investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. It rolls up into other Bloomberg flagship indices, such as the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.

Bloomberg Gbl Agg xUSD Fl Aj RIC TR HUSD

The index measures the performance of the global, investment-grade, fixed rate debt markets, including government, government agency, corporate and securitized non-U.S. fixed income investments - all issued in currencies other than the U.S. dollar and with maturities of more than one year - with the foreign currency exposure of the securities included in the Barclays Global Aggregate ex-USD Float Adjusted RIC Capped Index hedged to the Canadian dollar. It is market capitalization-weighted.

Morningstar Lifetime Mod 2015 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2015. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Lifetime Mod 2020 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2020. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Lifetime Mod 2025 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2025. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Lifetime Mod 2060 TR USD

The index measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for a US investor who has a target maturity date of 2060. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

Morningstar Category (Peer Group) Classification Definitions

Large Growth, LG

Large-growth portfolios invest in big U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). Most of these portfolios focus on companies in rapidly expanding industries. The market capitalization of large-cap companies may change over time and is not authoritatively defined. While larger companies tend to be less volatile than small- or mid-cap companies, an investor can still lose money when investing in the stocks of large-cap companies.

Large Blend, LB

Large-blend portfolios are fairly representative of the overall U.S. stock market in size, growth rates, and price. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios tend to invest across the spectrum of U.S. industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index. The market capitalization of large-cap companies may change over time and is not authoritatively defined. While larger companies tend to be less volatile than small- or mid-cap companies, an investor can still lose money when investing in the stocks of large-cap companies.

Large Value, LV

Large-value portfolios invest primarily in big U.S. companies that are less expensive or growing more slowly than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow). The market capitalization of large-cap companies may change over time and is not authoritatively defined. While larger companies tend to be less volatile than small- or mid-cap companies, an investor can still lose money when investing in the stocks of large-cap companies.

Mid-Cap Growth, MG

Some mid-cap growth portfolios invest in stocks of all sizes, thus leading to a mid-cap profile, but others focus on midsize companies. Mid-cap growth portfolios target U.S. firms that are projected to grow faster than other mid-cap stocks, therefore commanding relatively higher prices. The U.S. mid-cap range for market capitalization typically falls between \$1 billion-\$8 billion and represents 20% of the total capitalization of the U.S. equity market. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). The market capitalization of mid-cap companies may change over time and is not authoritatively defined. The securities of these companies may be more volatile and less liquid than those of larger companies.

Mid-Cap Blend, MB

The typical mid-cap blend portfolio invests in U.S. stocks of various sizes and styles, giving it a middle-of-the-road profile. Most shy away from high-priced growth stocks, but aren't so price conscious that they land in value territory. The U.S. mid-cap range for market capitalization typically falls between \$1 billion-\$8 billion and represents 20% of the total capitalization of the U.S. equity market. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. The market capitalization of mid-cap companies may change over time and is not authoritatively defined. The securities of these companies may be more volatile and less liquid than those of larger companies.

Morningstar Category (Peer Group) Classification Definitions

Small Growth, SG

Small-growth portfolios focus on faster-growing companies whose shares are at the lower end of the market-capitalization range. These portfolios tend to favor companies in up-and coming industries or young firms in their early growth stages. Because these businesses are fast growing and often richly valued, their stocks tend to be volatile. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small-cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). The market capitalization of small-cap companies may change over time and is not authoritatively defined. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies.

Small Blend, SB

Small-blend portfolios favor U.S. firms at the smaller end of the market-capitalization range. Some aim to own an array of value and growth stocks while others employ a discipline that leads to holdings with valuations and growth rates close to the small-cap averages. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small-cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. The market capitalization of small-cap companies may change over time and is not authoritatively defined. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies.

Small Value, SV

Small-value portfolios invest in small U.S. companies with valuations and growth rates below other small-cap peers. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow). The market capitalization of small-cap companies may change over time and is not authoritatively defined. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies.

Utilities, SU

Specialty-utilities portfolios seek capital appreciation by investing primarily in equity securities of U.S. or non-U.S. public utilities including electric, gas, and telephone-service providers. Specialty funds generally are non-diversified and more susceptible to financial, market, economic or political events affecting the particular issuers and/or industry sectors in which they invest and therefore may be more volatile or risky than less concentrated investments

Foreign Large Blend, FB

Foreign large-blend portfolios invest in a variety of big international stocks. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asia ex- Japan). The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios typically will have less than 20% of assets invested in U.S. stocks. Investments in international markets present special risks including currency fluctuation, the potential for diplomatic and political instability, regulatory and liquidity risks, foreign taxation and differences in auditing and other financial standards.

Diversified Emerging Mkts, EM

Diversified emerging-markets portfolios tend to divide their assets among 20 or more nations, although they tend to focus on the emerging markets of Asia and Latin America rather than on those of the Middle East, Africa, or Europe. These portfolios invest at least 70% of total assets in equities and invest at least 50% of stock assets in emerging markets. Investments in international markets present special risks including currency fluctuation, the potential for diplomatic and political instability, regulatory and liquidity risks, foreign taxation and differences in auditing and other financial standards.

Morningstar Category (Peer Group) Classification Definitions

Real Estate, SR

Specialty-real estate portfolios invest primarily in real-estate investment trusts (REITs) of various types. REITs are companies that develop and manage real-estate properties. There are several different types of REITs, including apartment, factory-outlet, health-care, hotel, industrial, mortgage, office, and shopping center REITs. Some portfolios in this category also invest in real-estate operating companies. Specialty funds generally are non-diversified and more susceptible to financial, market, economic or political events affecting the particular issuers and/or industry sectors in which they invest and therefore may be more volatile or risky than less concentrated investments.

Stable Value, VL

Stable-value portfolios seek to provide income while preventing price fluctuations. The most common stable-value portfolios invest in a diversified portfolio of bonds and enter into wrapper agreements with financial companies to guarantee against fluctuations in their share prices. These wrapper agreements typically provide price stability on a day-to-day basis, thereby insulating each portfolio's net asset value from interest-rate volatility. Therefore, the duration for each of these funds is essentially zero. This category is only used in Morningstar's custom fund and separate account databases. Stable value funds have exposure to financial, market, credit, prepayment and interest rate risks, and may lose value.

Intermediate Core Bond, CI

Intermediate-term bond portfolios invest primarily in corporate and other investment-grade U.S. fixed-income issues and have durations of 3.5 to six years (or, if duration is unavailable, average effective maturities of four to 10 years). These portfolios are less sensitive to interest rates, and therefore less volatile, than portfolios that have longer durations. Bonds with longer maturities tend to be more sensitive to changes in interest rates than debt securities with shorter durations.

Intermediate Core-Plus Bond, PI

Intermediate-term core-plus bond portfolios invest primarily in investment-grade U.S. fixed-income issues including government, corporate, and securitized debt, but generally have greater flexibility than core offerings to hold non-core sectors such as corporate high yield, bank loan, emerging-markets debt, and non-U.S. currency exposures. Their durations (a measure of interest-rate sensitivity) typically range between 75% and 125% of the three-year average of the effective duration of the Morningstar Core Bond Index.

Global Bond-USD Hedged, WH

USD hedged portfolios typically invest 40% or more of their assets in fixed-income instruments issued outside of the U.S. These portfolios invest primarily in investment-grade rated issues, but their strategies can vary. Some follow a conservative approach, sticking with high-quality bonds from developed markets. Others are more adventurous, owning some lower-quality bonds from developed or emerging markets. Some portfolios invest exclusively outside the U.S., while others invest in both U.S. and non-U.S. bonds. Funds in this category hedge most of their non-U.S.-dollar currency exposure back to the U.S. dollar.

Target-Date 2015, TD

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2011-2015) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Morningstar Category (Peer Group) Classification Definitions

Target-Date 2020, TE

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2016-2020) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2025, TG

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2021-2025) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2030, TH

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2026-2030) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2035, TI

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2031-2035) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Target-Date 2040, TJ

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2036-2040) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Target-Date 2045, TK

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2041-2045) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Over time, management adjusts the allocation among asset classes to more conservative mixes as the target date approaches. Investments in Target-Date funds are not guaranteed and investors can lose money, including at and after the target date.

Morningstar Category (Peer Group) Classification Definitions

Target-Date 2050, TN

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2046-2050) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Target-Date 2055, TL

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2051-2055 and beyond) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target date portfolio is part of a series of funds offering multiple retirement dates to investors.

Target-Date 2060, XQ

Target-date portfolios provide a diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the year 2060 and beyond) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target date portfolio is part of a series of funds offering multiple retirement dates to investors.
